

HPC User Environment 1

Oleg N. Starovoytov

HPC User Services

LSU HPC / LONI

sys-help@loni.org

Louisiana State University

Baton Rouge

January 25, 2023

- **HPC User Environment 1**

1. An intro to HPC
2. Accounts and allocations
3. Into the cluster
4. Software environment (modules)

- **HPC User Environment 2**

1. Queuing system
2. How to run jobs

■ HPC User Environment 1

1. An Intro to HPC
 - 1) Why HPC?
 - 2) What is HPC?
 - 3) Our HPC
2. Getting started
 - 1) Accounts
 - 2) Allocation
3. Into the cluster
 - 1) Getting connected
 - 2) File system
4. Software environment
 - 1) Preinstalled (modules)
 - 2) User installation

- **HPC User Environment 1**

1. Intro to HPC
 - 1) Why HPC?
 - 2) What is HPC?
 - 3) Our HPC
2. Getting started
 - 1) Accounts
 - 2) Allocation
3. Into the cluster
 - 1) Getting connected
 - 2) File system
4. Software environment
 - 1) Preinstalled (modules)
 - 2) User installation

1) Why HPC?

- Everything COMPUTER!

ENIAC, 1945

First all-vacuum tube supercomputer (18000 vacuum tubes), a decimal computer, hard-wired program with dials and switches.

1) Why HPC?

Moor's law – double transistors every two years

Transistor size – atom size

Clock speed? –
cycles per second

Intel® Core™ i7-1065G7 Processor
8M Cache, up to 3.90 GHz

Parallel computing

1) Why HPC?

Dual-core CPU

Quad-core CPU

CORE = TASK UNIT

CPU = PROCESSOR

Octa-core CPU

Multiple-core CPU

- [illegible]

- **HPC User Environment 1**

1. Intro to HPC
 - 1) Why HPC?
 - 2) What is HPC?
 - 3) Our HPC
2. Getting started
 - 1) Accounts
 - 2) Allocation
3. Into the cluster
 - 1) Getting connected
 - 2) File system
4. Software environment
 - 1) Preinstalled (modules)
 - 2) User installation

2) What is HPC?

- **High Performance Computing (HPC)**: the ability to process data and perform complex calculations at high speeds using the cutting-edge modern technology.
- **Supercomputer**: the class of machines that rank among the fastest in the world.
 - Rule of thumb: at least 100 times as powerful as a single PC.

600 mph

60 mph

How do we evaluate the performance of a supercomputer?

- ## Computer performance

FLOPS

$\downarrow$ $\times$ $\downarrow$ $\times$ $\downarrow$

1267 GHz 18 4.4 GHz $\frac{\text{FLOPs}}{\text{cycle}}$ $\downarrow$

1.27 TFLOPS 16

CPU clock rate: 4.4 GHz
CORE: 18 cores
FLOPs per cycle: 16

2) What is HPC?

- Your smartphone vs. supercomputer 22 years ago

- Apple A16 Bionic (neural engine): **17 TFLOPS**
- #1 ASCI WHITE, SP POWER3 375 MHZ: **7.3 (12.3) TFLOPS**
Total Cores: **8,192**, OS: **AIX**; Vendor: **IBM (2001)**
- #1 Fujitsu 105MHz: **0.2 (0.4) TFLOPS**
Total Cores: **140**, OS: **UXP/V**; Vendor: **Fujitsu (1995)**

CPU clock rate: 3.46 GHz
CORE: 6 cores
Transistors: 16 billion
Technology: 4 nm
OS system: iOS

iPhone 14 Pro (2022)

Computer performance

Name	FLOPS
yottaFLOPS	10^{24}
zettaFLOPS	10^{21}
exaFLOPS	10^{18}
petaFLOPS	10^{15}
teraFLOPS	10^{12}
gigaFLOPS	10^9
megaFLOPS	10^6
kiloFLOPS	10^3

i. **University level: LSU HPC**

- Available to **LSU (Baton Rouge campus) Faculty** and their **affiliates**
- Administered & supported by HPC@LSU

A horizontal banner with a dark purple background. On the left, the letters 'HPC' are written in large, bold, dark blue font. To the right of 'HPC', the words 'HIGH PERFORMANCE COMPUTING' are written in a smaller, white, sans-serif font. The word 'HIGH' is on the top line, 'PERFORMANCE' is on the middle line, and 'COMPUTING' is on the bottom line. The 'H' in 'HIGH' is yellow.

3) Our HPC

1) Accounts

i. Eligibility (Summary)

	LSU HPC	LONI
Available to...	✓ Faculty of LSU Baton Rouge campus ✓ Research staff (postdocs, research associates, ...) ✓ Students (graduate & undergraduate) ✓ Research collaborators (LSU & non-LSU) ✓ Other affiliates	✓ Faculty of LONI subscribers ✓ Research staff (postdocs, research associates, ...) ✓ Students (graduate & undergraduate) ✓ Research collaborators ✓ Other affiliates
Requirements	• Institutional email (e.g., @lsu.edu) • Account sponsor / PI ✓ <u>Full-time faculty & certain research staff @ LSU Baton Rouge campus</u> × Students, postdocs, research associates (even @ LSU) × Outside collaborators × HPC staff	• Institutional email (e.g., @uno.edu) • Account sponsor / PI ✓ <u>Full-time faculty & certain research staff @ LONI subscribers</u> × Students, postdocs, research associates (even @ LONI subscribers) × Outside collaborators × HPC staff

i. Eligibility

Test1

❖ I can be granted an LSU HPC or LONI account if:

- a) I am using HPC resource for my research, the account will be sponsored by my advisor (PI)
- b) I am attending HPC training sessions, the account will be sponsored by the HPC staff
- c) I am taking a class that requires using HPC resource, the account will be sponsored by the course instructor
- d) a and b
- e) a and c
- f) All of the above

i. Eligibility

Test1

❖ I can be granted an LSU HPC or LONI account if:

- a) I am using HPC resource for my research, the account will be sponsored by my advisor (PI)
- b) I am attending HPC training sessions, the account will be sponsored by the HPC staff
- c) I am taking a class that requires using HPC resource, the account will be sponsored by the course instructor
- d) a and b
- e) a and c
- f) All of the above

i. Eligibility

Test2

❖ Who may be eligible for LSU HPC accounts? (Choose all that apply)

- a) Alice, a professor in Europe, who collaborates with Professor X @ LSU Baton Rouge campus and wishes to run simulations
- b) Bob, recently graduated from LSU and moved to New York for a postdoc position, but is still working with his PhD advisor Professor Y @ LSU Baton Rouge campus to finish their unfinished research
- c) Charlie, a current undergraduate student @ LSU Baton Rouge campus, who is taking an online Machine Learning course given by Professor Z @ Stanford, and needs practice on a GPU-enabled HPC system

i. Eligibility

Test2

❖ Who may be eligible for LSU HPC accounts? (Choose all that apply)

- a) Alice, a professor in Europe, who collaborates with Professor X @ LSU Baton Rouge campus and wishes to run simulations
- b) Bob, recently graduated from LSU and moved to New York for a postdoc position, but is still working with his PhD advisor Professor Y @ LSU Baton Rouge campus to finish their unfinished research
- c) Charlie, a current undergraduate student @ LSU Baton Rouge campus, who is taking an online Machine Learning course given by Professor Z @ Stanford, and needs practice on a GPU-enabled HPC system

ii. How to apply

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu/login_request.php	https://allocations.loni.org/login_request.php

1) Accounts

ii. How to apply

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu/login_request.php	https://allocations.loni.org/login_request.php

1) Accounts

ii. How to apply

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu/login_request.php	https://allocations.loni.org/login_request.php
Steps	a) Enter your institutional email and submit b) Check email and open the link (valid for 24 hrs) c) Fill the form (In Contact/Collaborator, enter your account sponsor's full name) and submit d) You will receive a notification when your account is activated once we have verified your credentials • Be patient. Do not reset your password if you cannot log in yet.	

iii. Manage your account

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu	https://allocations.loni.org

iii. Manage your account

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu	https://allocations.loni.org
Things to do	• Change personal information, password, ... • Change default shell (bash / tcsh / ksh / csh / sh) • Request / manage / check allocation • Request / manage / check storage • ...	

iv. Reset password

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu/user_reset.php	https://allocations.loni.org/user_reset.php

iv. Reset password

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu/user_reset.php	https://allocations.loni.org/user_reset.php
Steps	a) Enter your registered email and submit b) Check email and open the link (valid for 24 hrs) c) Enter your new password and submit d) You will receive a confirmation email once your new password is approved by our staff ** IMPORTANT ** • Your new password is NOT available right away (wait until you receive confirmation of approval) • Do NOT submit multiple times	

iv. Reset password

Case study

- **User:**
“I have been trying to access my accounts on QB2 via an SSH client, but the connection won't go through. I reset my passwords this weekend and the terminals keep giving me a ‘Password Authentication Failed’ error message.....”
- **User Services:**
“When you send a password reset request, it has to be manually processed for security reason before your new password becomes available.”

iv. Reset password

Password security

- Passwords should be changed as soon as your account is activated for added security.
- Password must be at least 12 and at most 32 characters long, must contain **3 of the 4 classes** of characters
 - Lowercase letters
 - Uppercase letters
 - Digits
 - Special characters (punctuation, spaces, etc.)
- Do not use a word or phrase from a dictionary
- Do not use a word that can be obviously tied to the user (*e.g.*, your name, user name, *etc.*)
- **Do NOT share your password to others, including your advisor!!!!**

- **HPC User Environment 1**

1. Intro to HPC
 - 1) Why HPC?
 - 2) What is HPC?
 - 3) Our HPC
2. Getting started
 - 1) Accounts
 - 2) Allocation
3. Intro the cluster
 - 1) Getting connected
 - 2) File system
4. Software environment
 - 1) Preinstalled (modules)
 - 2) User installation

2) Allocation

i. What is **allocation**?

- A deposit of **service units (SU)** that users will be charged from to run jobs on our cluster
 - 1 SU = 1 core-hour
 - Example:
 - My allocation: 50,000 SU
 - Running a job: 24 core * 10 hours = 240 SU
 - Balance: 49,760 SU
 - Cannot run jobs after exhausted
- All LSU HPC & LONI clusters requires allocation to run jobs
- **Free** to users
- But not worthless! (**1 SU $\approx$ \$0.1**)

ii. Eligibility

You are a ...	To get allocation ...

ii. Eligibility

You are a ...	To get allocation ...
Account sponsor / PI*	Submit a request

* Full-time faculty & certain research staff @ LSU / LONI subscribers

ii. Eligibility

You are a ...	To get allocation ...
Account sponsor / PI*	Submit a request
Non-account sponsor / non-PI	Join your sponsor's allocation

* Full-time faculty & certain research staff @ LSU / LONI subscribers

2) Allocation

iii. Request an allocation (if you are an account sponsor / PI)

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu/allocations.php	https://allocations.loni.org/allocations.php

iii. Request an allocation (if you are an account sponsor / PI)

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu/allocations.php	https://allocations.loni.org/allocations.php
Steps	a) Log in using your account b) Click on “New Allocation for [Cluster Name]” • SuperMIC & SuperMike III share allocations • QB2 and QB3 share allocations • Deep Bayou has separated allocation c) Fill the form and submit d) Your request will be reviewed, and you will be notified if your allocation is approved	

iii. Request an allocation (if you are an account sponsor / PI)

Allocation types

Type	Size [SU]	Can be requested...	Decisions made on...	Activated on...	Limited to...

iii. Request an allocation (if you are an account sponsor / PI)

Allocation types

Type	Size [SU]	Can be requested...	Decisions made on...	Activated on...	Limited to...
Startup	50,000	Any time	Following request	Jan 1 Apr 1 Jul 1 Oct 1	2 active / PI

2) Allocation

iii. Request an allocation (if you are an account sponsor / PI)

Allocation types

Type	Size [SU]	Can be requested...	Decisions made on...	Activated on...	Limited to...
Startup	50,000	Any time	Following request	Jan 1 Apr 1 Jul 1 Oct 1	2 active / PI
Research	> 50,000	> 1 month before decision date	Jan 1 Apr 1 Jul 1 Oct 1		[LSU HPC] 3,000,000 SU / allocation 5,000,000 SU / PI
					[LONI] 6,000,000 SU / allocation 12,000,000 SU / PI

2) Allocation

iii. Request an allocation (if you are an account sponsor / PI)

Allocation types

Type		Size [SU]	Proposal				
			Technical merit	Software characteristics	Previous impact and outcome	External funding or LSU demand	# of pages
Startup		50,000	(Not required)				
Research	A	>50,000 and ≤300,000	Required	Required	Optional	Optional	4
	B	>300,000 and ≤1,000,000	Required	Required	Required	Optional	5
	C	>1,000,000	Required	Required	Required	Required	6

2) Allocation

iv. Join an allocation (if you are not an account sponsor / PI)

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu/allocations.php	https://allocations.loni.org/allocations.php

2) Allocation

iv. Join an allocation (if you are not an account sponsor / PI)

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu/allocations.php	https://allocations.loni.org/allocations.php
Steps	[Method 1: Join by request] a) Log in using your account b) Click on “Join allocation” c) Search for your account sponsor / PI, and click "Join Projects" d) Find the desired allocation you wish to join, click “Join” e) Your account sponsor / PI will receive an email notification and approve your request [Method 2: Ask your PI to add you] a) Ask your PI to log in using his/her account b) Click on “Manage memberships” c) Find the desired allocation, click “Edit -> Add a User” d) Search for your account, click “Add to [Allocation name]”	

* HPC staff **CANNOT** add you to allocations! Must be approved by your PI!

iv. Join an allocation (if you are not an account sponsor / PI)

Case study

- **User:**
“Hi, my PI recently applied for an allocation on SuperMIC and was approved (see forwarded email below). However, I do not see that this allocation is available for my use in <https://accounts.hpc.lsu.edu/balances.php> . When will I be able to access the allocation?”
- **User Services:**
“You should either request to join your PI’s allocation through the user portal, or ask your PI to add you to the allocation”

- **Test**

❖ What are the TWO things required to run jobs on our clusters?

- a) An active myLSU account
- b) An active LSU HPC / LONI account
- c) An active LSU HPC / LONI allocation
- d) A valid payment method (credit card / bank account / check / cash ...) to pay for the services

- Test

❖ What are the TWO things required to run jobs on our clusters?

- a) An active myLSU account
- b) An active LSU HPC / LONI account
- c) An active LSU HPC / LONI allocation
- d) A valid payment method (credit card / bank account / check / cash ...) to pay for the services

- Login to one of the user portals (LSU HPC or LONI) with your HPC username and password. Update your email and phone number (for practice).
 - LSU HPC: <https://accounts.hpc.lsu.edu>
 - LONI: <https://allocations.loni.org>
- Download MobaXterm (if you are Windows user)
- Review commands in Linux and the vim editor

Cheat sheet of Commands in Linux	
history	Command history
mkdir	Make a folder
ls	List a folder -a List all files including hidden -l Shows files with a long listing format
cd	Change directory
pwd	Show current directory
cp	Copy
rm	Remove files (CAREFUL!)
Up arrow (↑)	Move back in history
Tab	Fill in unique file name
Tab Tab	Press tab twice, show all available file names

Cheat sheet of vim editor

- vi (name of file)
- Commands in VI
 - i enter insert mode (-- INSERT -- shows in the bottom left corner)
 - esc exits insert mode, back to the command mode
 - dd -> deletes line
 - u -> Undo
 - Shift Z shift Z or :wq -> saves and exits VI
 - :q! -> exit without saving
 - : (some number) -> moves through file to row #
 - /(indicator) -> search
 - Use N to find Next
 - [(page up)] (page down)
- NO CAPS (for example :q! is not :Q!)

SuperMike-II at LSU (Open for general use)

1-Dec-2012

SuperMike-II is a 146 TFlops Peak Performance, 440 node, 16 processor Red Hat
Enterprise Linux 6 cluster from Dell with 2.6 GHz Intel Xeon 64-bit processors
and 32 GB RAM per node. GPUs and additional memory are available on some nodes.
This cluster is for authorized users of the LSU community. Access is restricted
to those who meet the criteria as stated on our website.

1-Feb-2013

SuperMike-II is open for general use. Please report problems to our email ticke
t
system at sys-help@loni.org so that we can address them.

Quotas for the /home volume are enabled at 5 GB. Please do

2) File system

2) File system

- **Most directories**
 - Write: ×
 - Read: (some)
 - Execute: (some)

2) File system

i. `/home/[username]`

- **Permission:**
 - Your own: √
 - Others: ×
- **Distributed:** √
- **Quota:** 5GB (QB2) / 10GB (others)
- **Lifetime:** Unlimited
- **Best for:** Code / executables

2) File system

ii. /work/[username]

- **Permission:**
 - Your own: √
 - Others: ×
- **Distributed:** √
- **Quota:** Unlimited
- **Lifetime:** 60 day of inactivity
- **Best for:** Job input / output

2) File system

iii. /project/[PI's username]

- **Permission:**
 - Group / project: √ *
 - Other groups / projects: ×
- **Distributed:** √
- **Quota:** As PI requested (N x 100GB)
- **Lifetime:** 1 year (renewable)
- **Best for:** Specific project / group sharing. **NOT for archive.**

2) File system

File system summary

Directory (folder)	Distributed	Throughput	Lifetime	Quota	Best for
/home/[username]	√	Low	Unlimited	5GB (QB2) 10GB (others)	Code / executables
/work/[username]	√	High	60 days of inactivity	Unlimited	Job input/output
/project/[PI's username]	√	Medium / High	1 year (renewable)	As PI requested (N x 100GB)	Specific project / group sharing. NOT for archive!
/var/scratch	×	High	End of job	Subject to node specs	(Most users do not need it. Only rare cases)

- **Tips**
 - **Neither /work nor /project** is for long-term storage
 - /work directory will be created **1 hour** after the first cluster login
 - /project directory: **Only PI w/ active allocations** can apply! (See appendix or contact us)
 - **Never** write output to your home directory!
 - Check current disk quota and usage: **balance / showquota**

2) File system

- File transfer

Commands	
scp / rsync	From/to a Unix/Linux/Mac machine (including between the clusters) - Syntax: - scp <options> <source> <destination> - rsync <options> <source> <destination>
wget	From a download link on a website (usually opened with a web browser) - Syntax: - wget <link>

- **Recommended paths:**
 - a) /home (for yourself)
 - b) /project (for group sharing or large applications)

- **Two types of software packages:**
 - Preinstalled (modules)
 - User installed

■ HPC User Environment 1

1. Intro to HPC
 - 1) Why HPC?
 - 2) What is HPC?
 - 3) Our HPC → **LSU HPC (SMIC, Deep Bayou, SuperMike III) / LONI (QB2, QB3)**
2. Getting started
 - 1) Accounts → **Need an account sponsor! Most likely a faculty**
 - 2) Allocation → **Request a new one or join an existing one**
3. Into the cluster
 - 1) Getting connected → **Logging in via SSH; Do NOT run jobs on head node**
 - 2) File system → **Know your /home, /work, /project**
4. Software environment
 - 1) Preinstalled → **Use modules**
 - 2) User installation → **No sudo or yum**

- **HPC User Environment 2**

1. Queuing system
2. How to run jobs

- **Contact user services**
 - Email Help Ticket: sys-help@loni.org
 - Telephone Help Desk: +1 (225) 578-0900

- **Storage allocation $\neq$ computing allocation (what we talked about today)**
- **PI can apply for extra disk space on the /project volume for you and his/her entire research group if**
 - your research requires some files to remain on the cluster for a fairly long period of time; **and**
 - their size exceeds the quota of the /home
- **The unit is 100 GB**
- **Storage allocations are good for 1 year, but can be extended based on the merit of the request**
- **Examples of valid requests**
 - I am doing a 12-month data mining project on a large data set
 - The package I am running requires 10 GB of disk space to install
- **Examples of invalid requests**
 - I do not have time to transfer the data from my scratch space to my local storage and I need a temporary staging area

- **An example of a simple module file (`~/my_module/gitkey`):**

```
#%Module
proc ModulesHelp { } {
    puts stderr { my compiled version of git.
}
}
module-whatis {version control using git}
set GIT_HOME /home/fchen14/packages/git-master/install
prepend-path PATH $GIT_HOME/bin
```

- **Add the path to the key to the MODULEPATH environment variable:**

```
$ export MODULEPATH=~/my_module:$MODULEPATH
```

- **Then try to use:**

```
$ module load gitkey
$ which git
$ module unload gitkey
$ which git
```
