HPC User Environment 1

Oleg N. Starovoytov

HPC User Services

LSU HPC / LONI

sys-help@loni.org

Louisiana State University

Baton Rouge

July 09, 2025

Outline

- **HPC User Environment 1**

  1. An Intro to HPC
  2. Accounts and allocations
  3. Introduction to the cluster
  4. Software environment (modules)

- **HPC User Environment 2**

  1. Queuing system
  2. How to run jobs

Outline

- **HPC User Environment 1**

1. An Intro to HPC
    1) Why HPC?
    2) What is HPC?
    3) Our HPC
2. Getting started
    1) Accounts
    2) Allocation
3. Into the cluster
    1) Getting connected
    2) File system
4. Software environment
    1) Preinstalled (modules)
    2) User installation

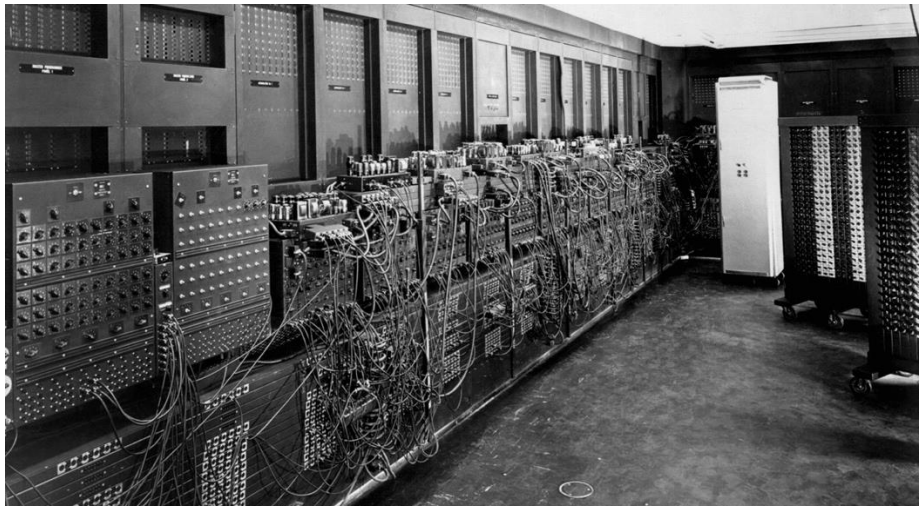
Outline

- **HPC User Environment 1**

1. Intro to HPC
    1) Why HPC?
    2) What is HPC?
    3) Our HPC
2. Getting started
    1) Accounts
    2) Allocation
3. Into the cluster
    1) Getting connected
    2) File system
4. Software environment
    1) Preinstalled (modules)
    2) User installation

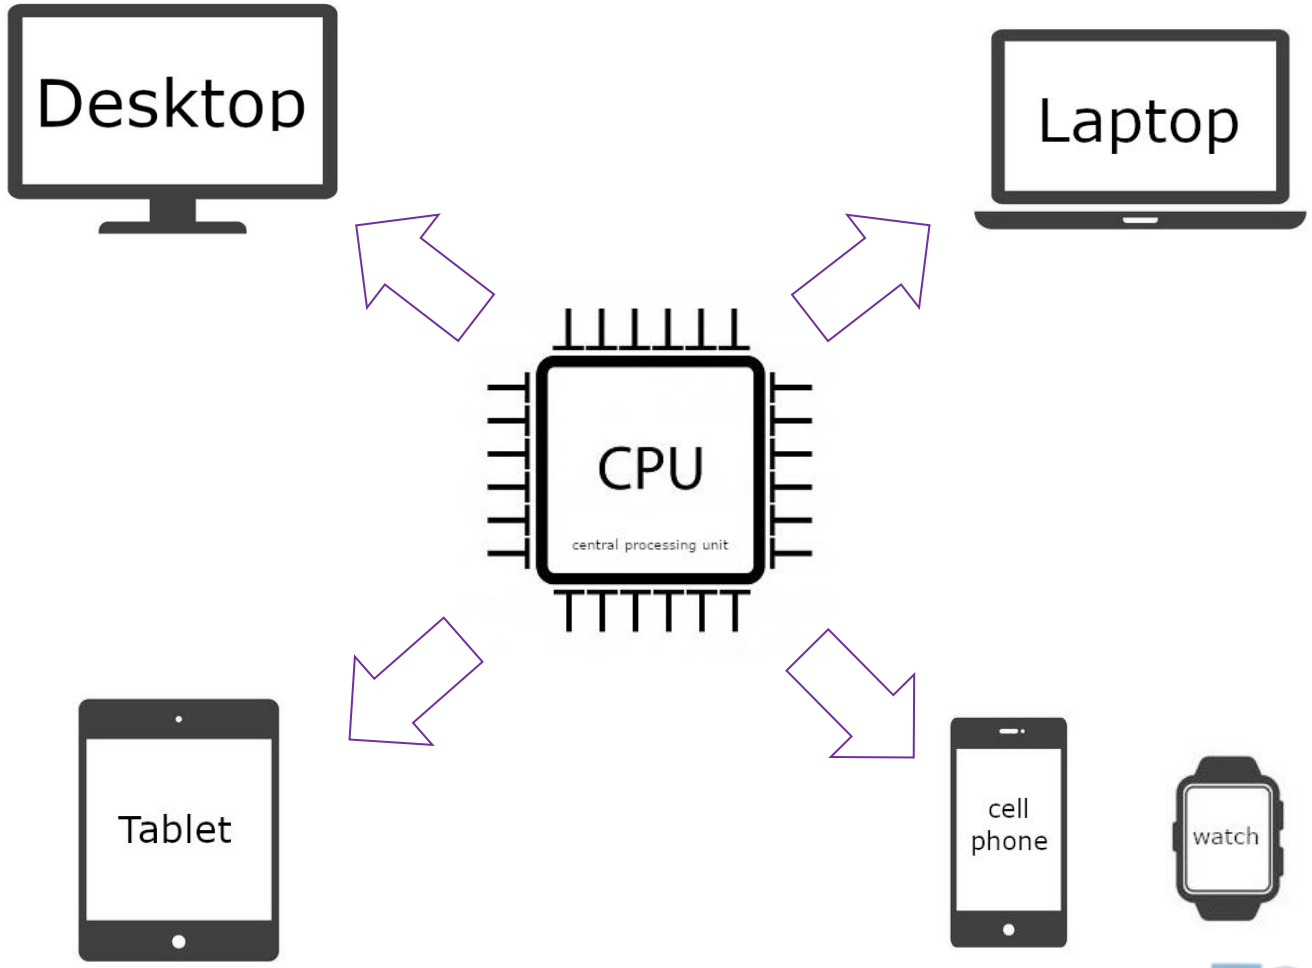
1) Why HPC?

- **Everything COMPUTER!**



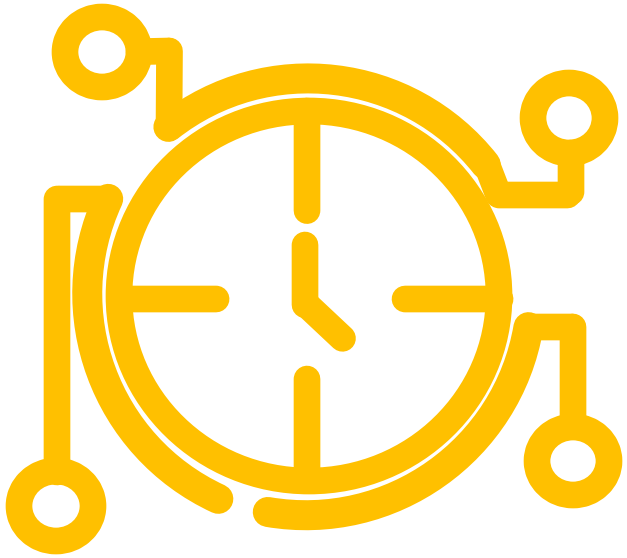
ENIAC, 1945

First all-vacuum tube supercomputer (18000 vacuum tubes), a decimal computer, hard-wired program with dials and switches.



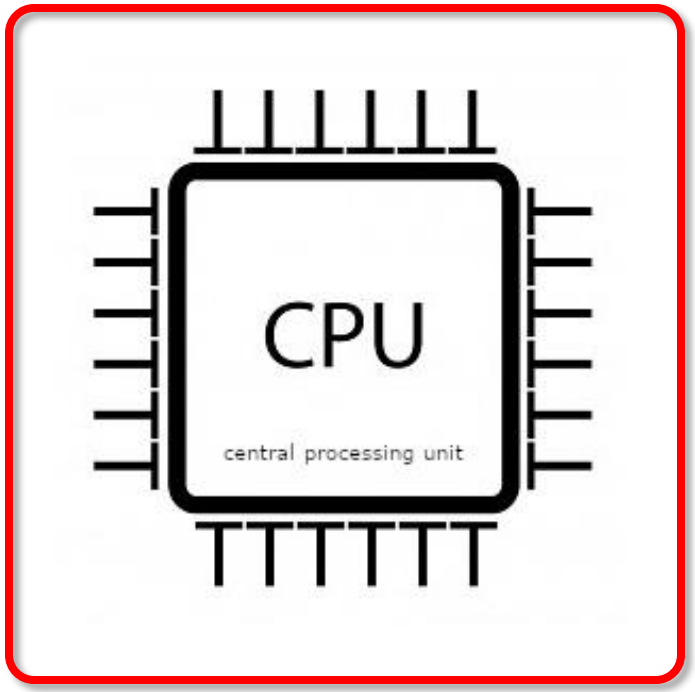
Moor's law – double transistors every two years

Transistor size – atom size

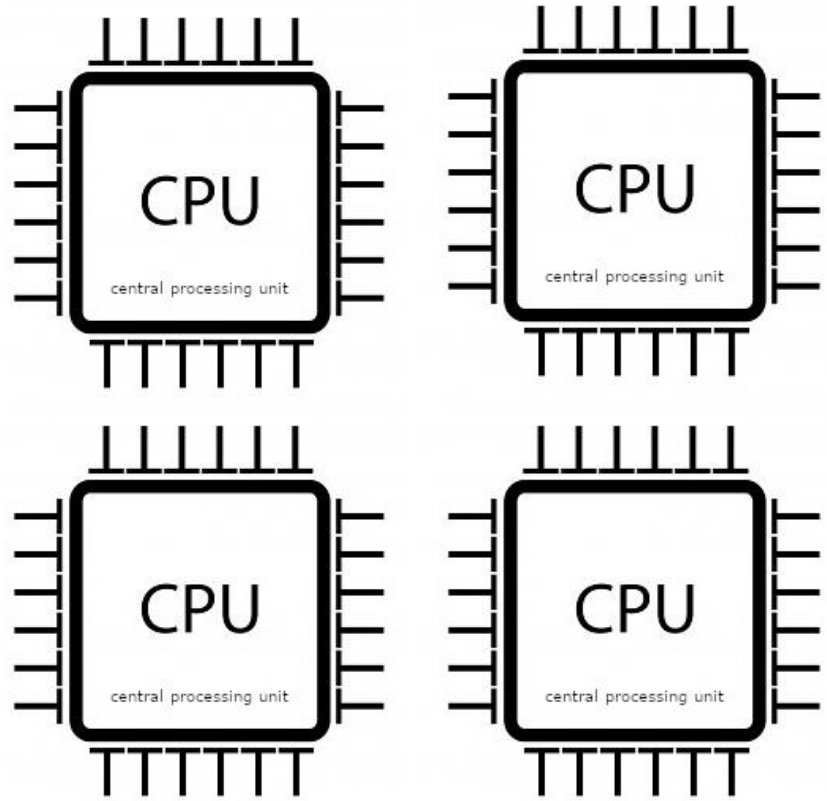


Clock speed? –

cycles per second

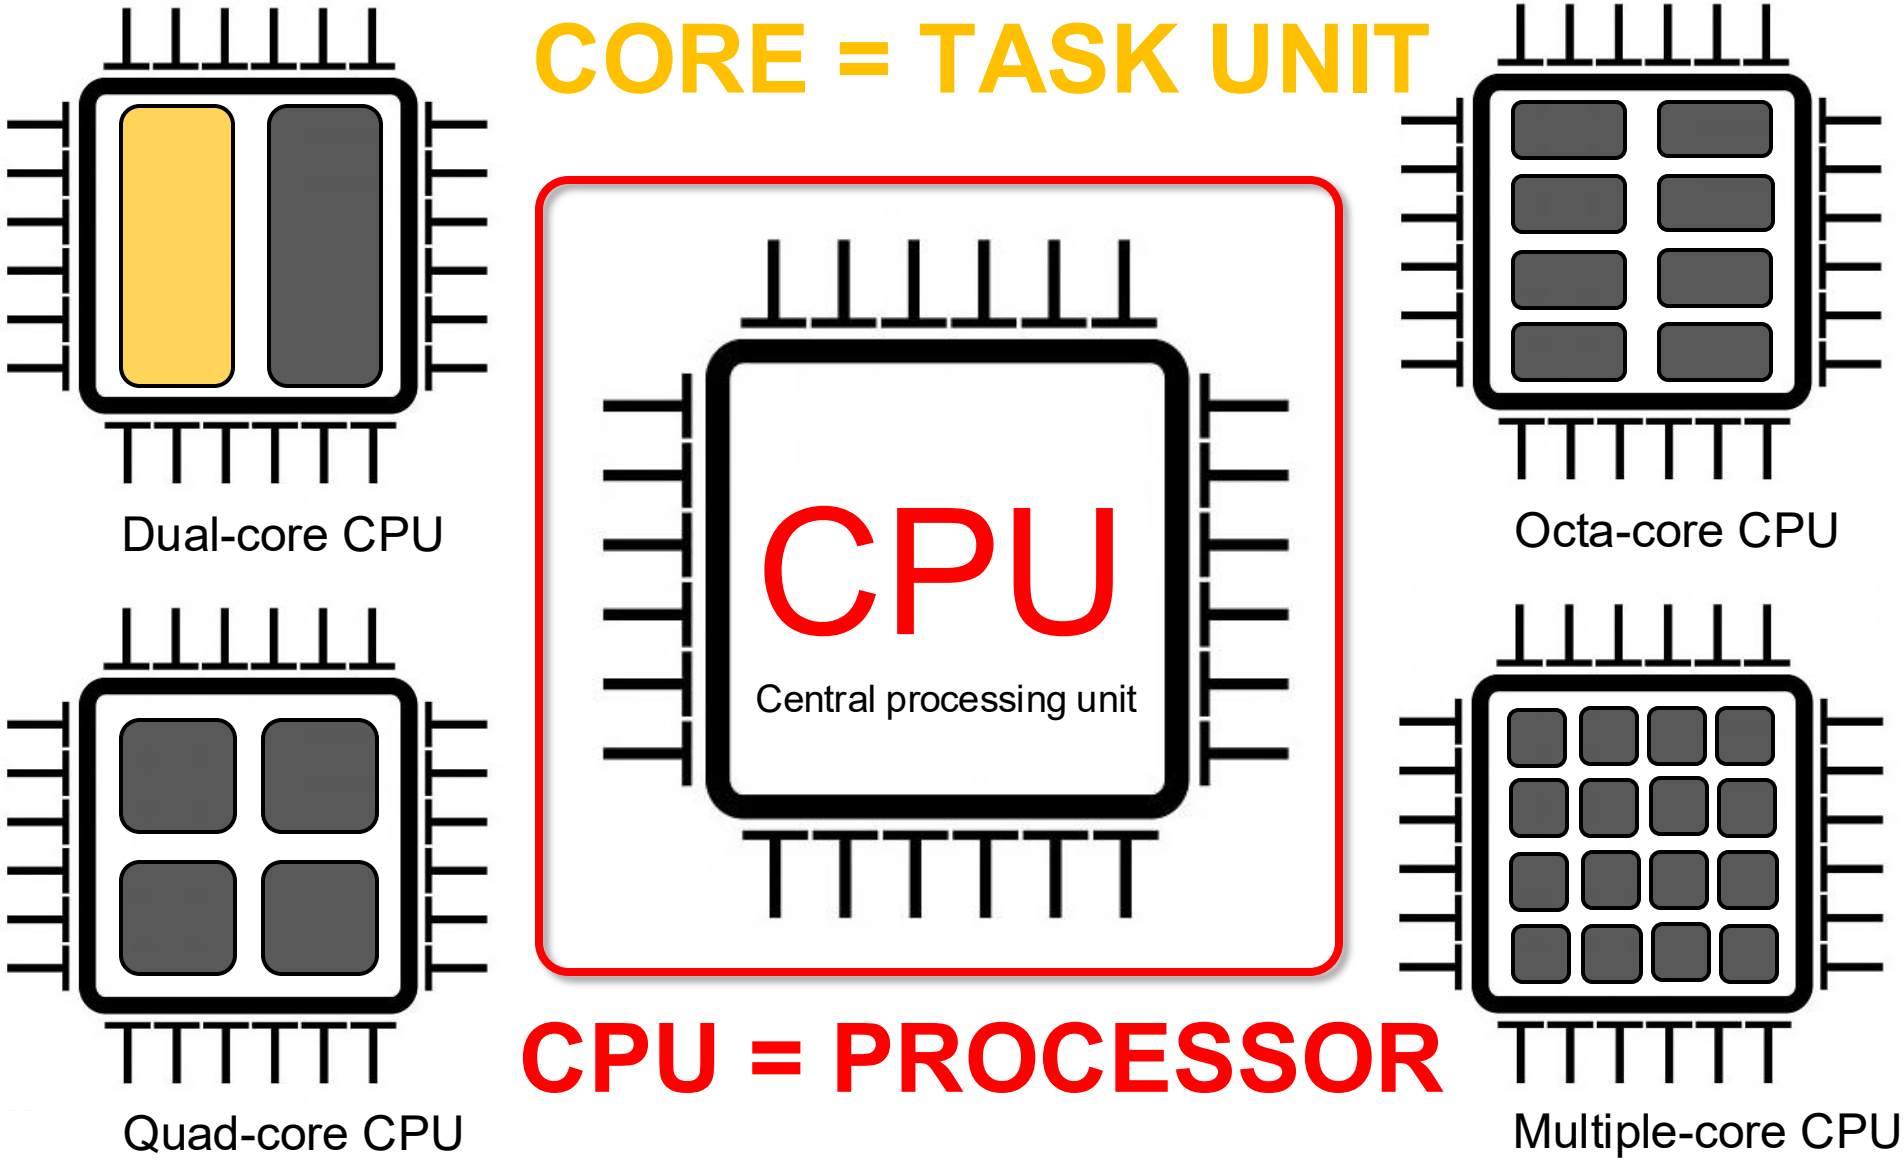


Intel® Core™ i7-1065G7 Processor
8M Cache, up to 3.90 GHz



Parallel computing

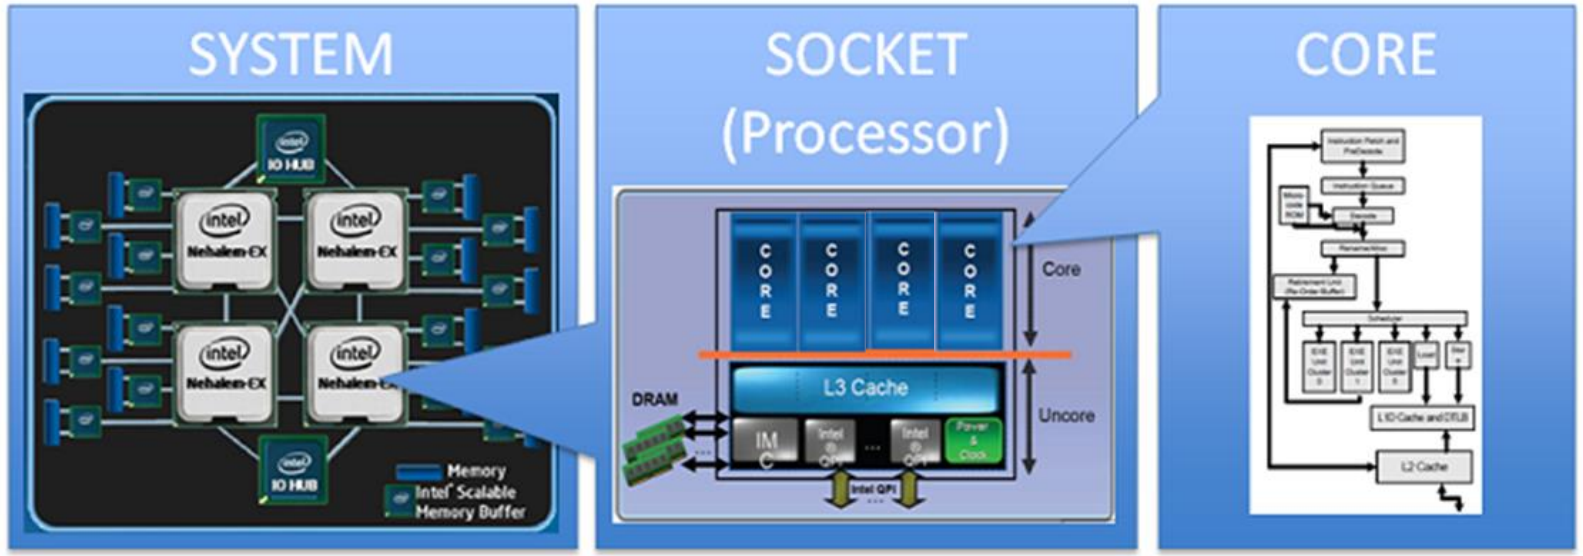
1) Why HPC?



CORE = TASK UNIT
CPU
Central processing unit
Dual-core CPU
Octa-core CPU
Quad-core CPU
Multiple-core CPU
CPU = PROCESSOR

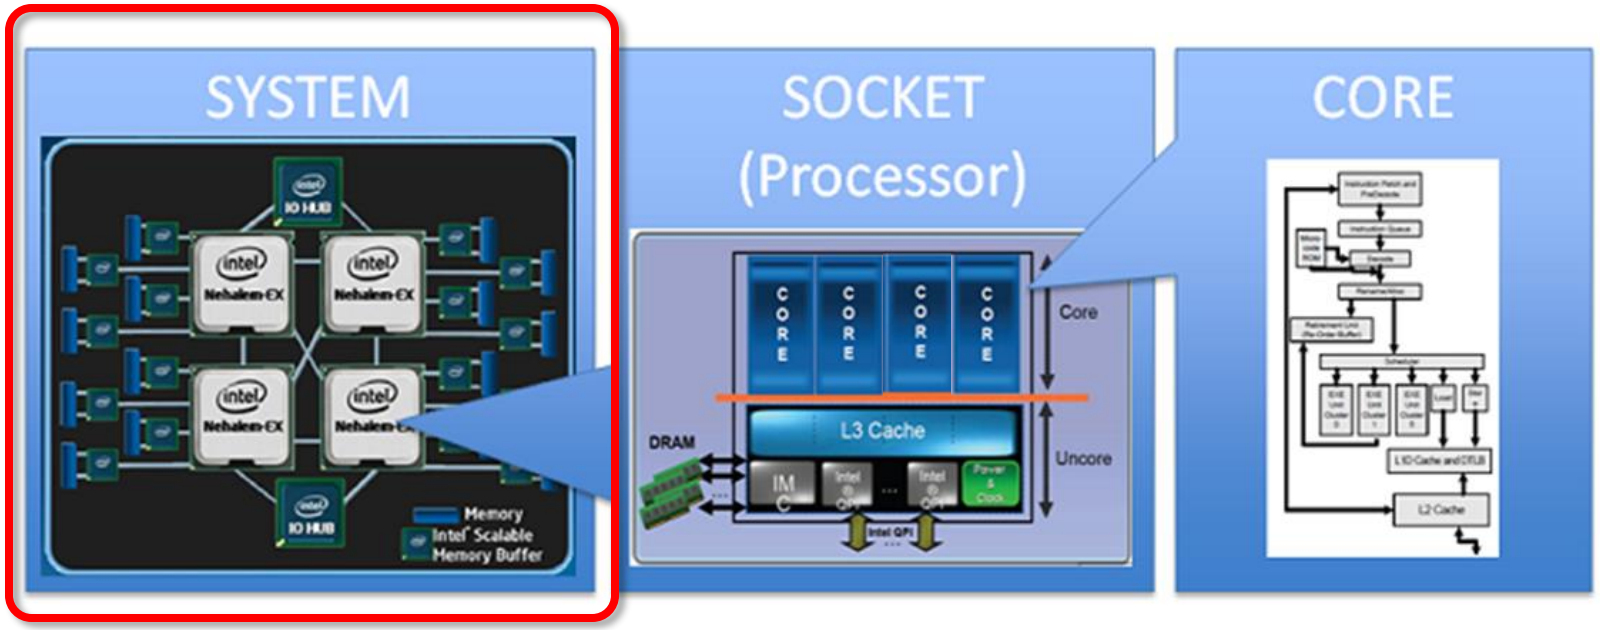
1) Why HPC?

- **How many processors does this computer have?**



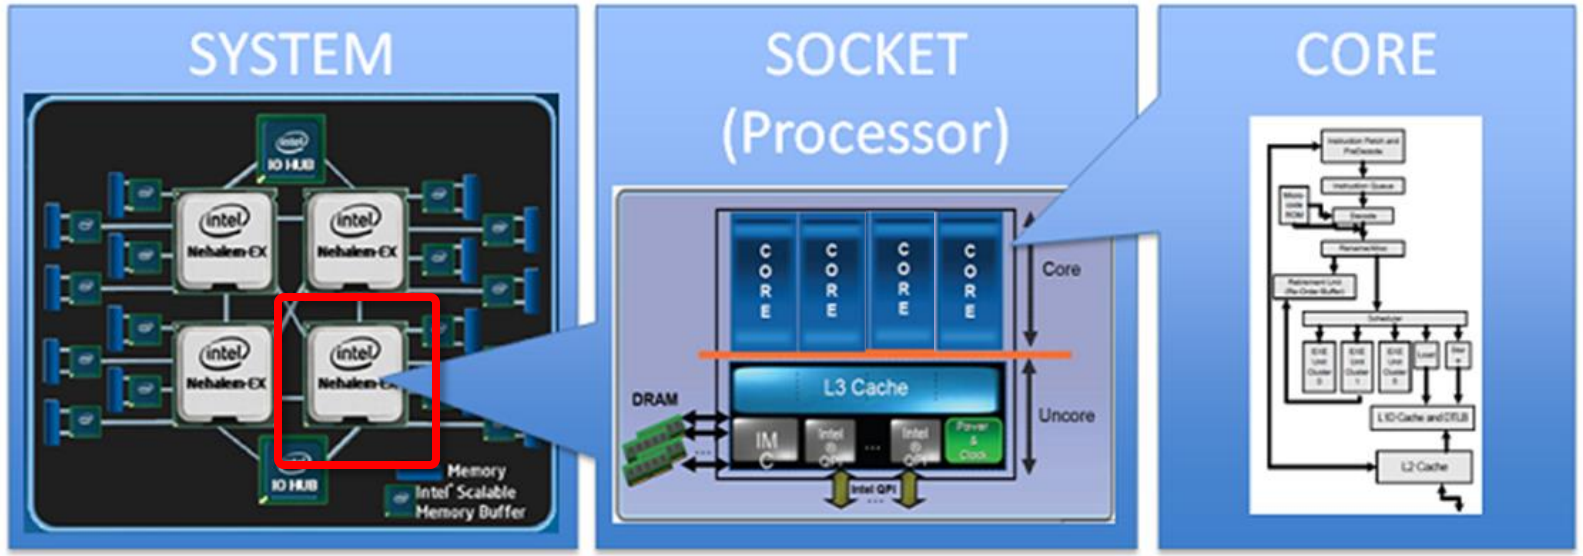
1) Why HPC?

- How many processors does this computer have?



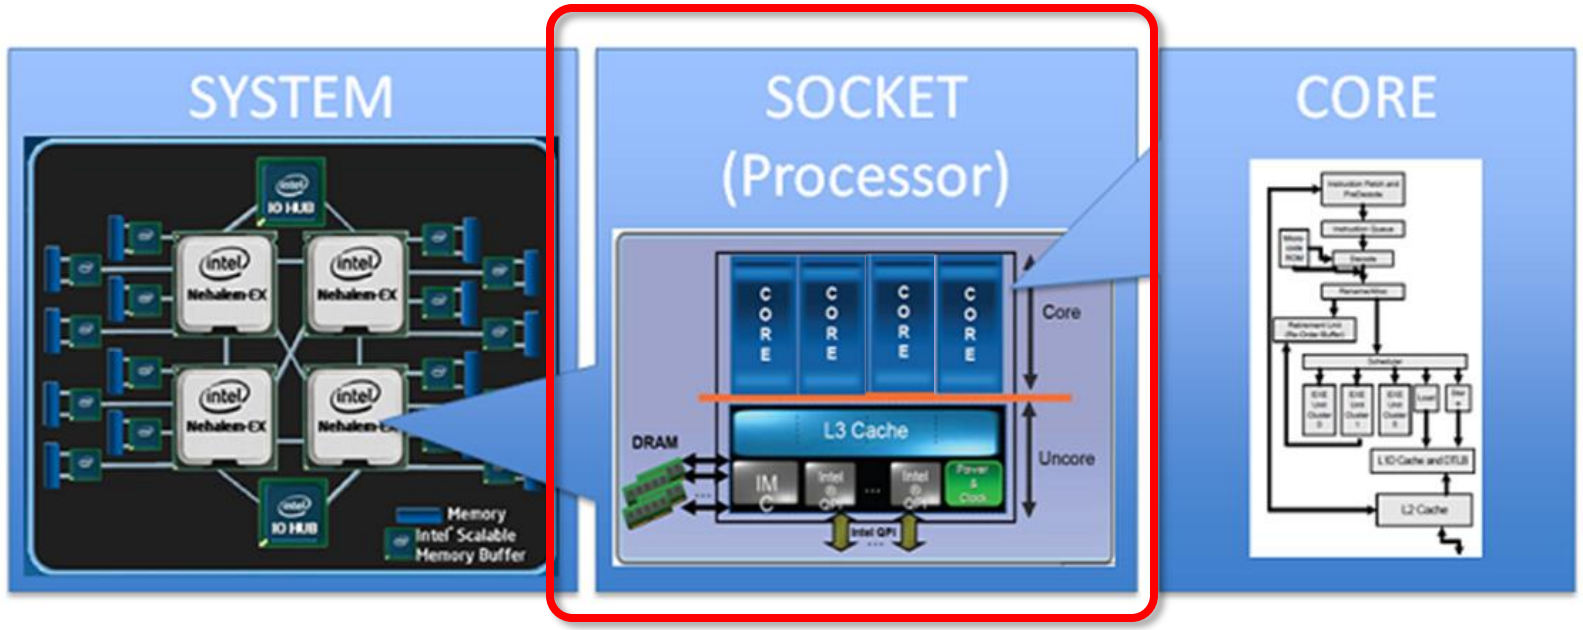
1) Why HPC?

- How many processors does this computer have?



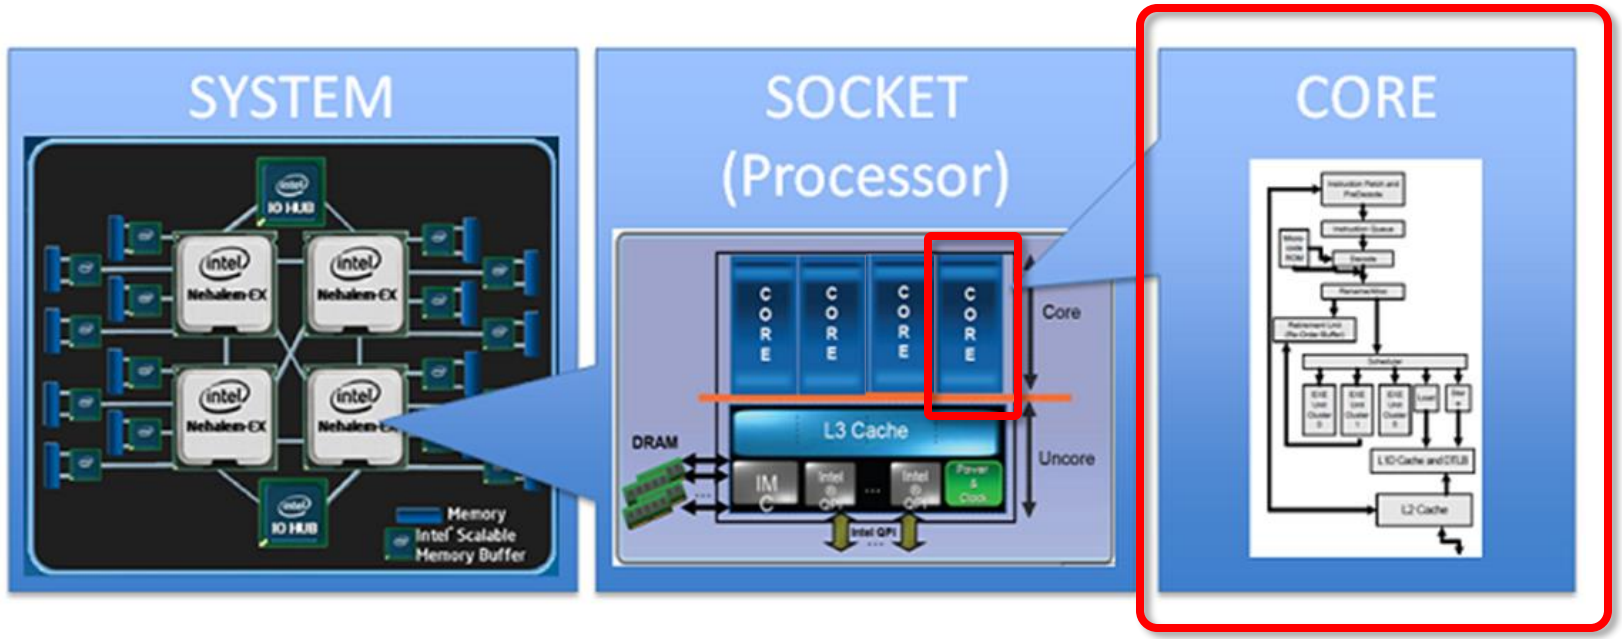
1) Why HPC?

- **How many cores does this computer have?**



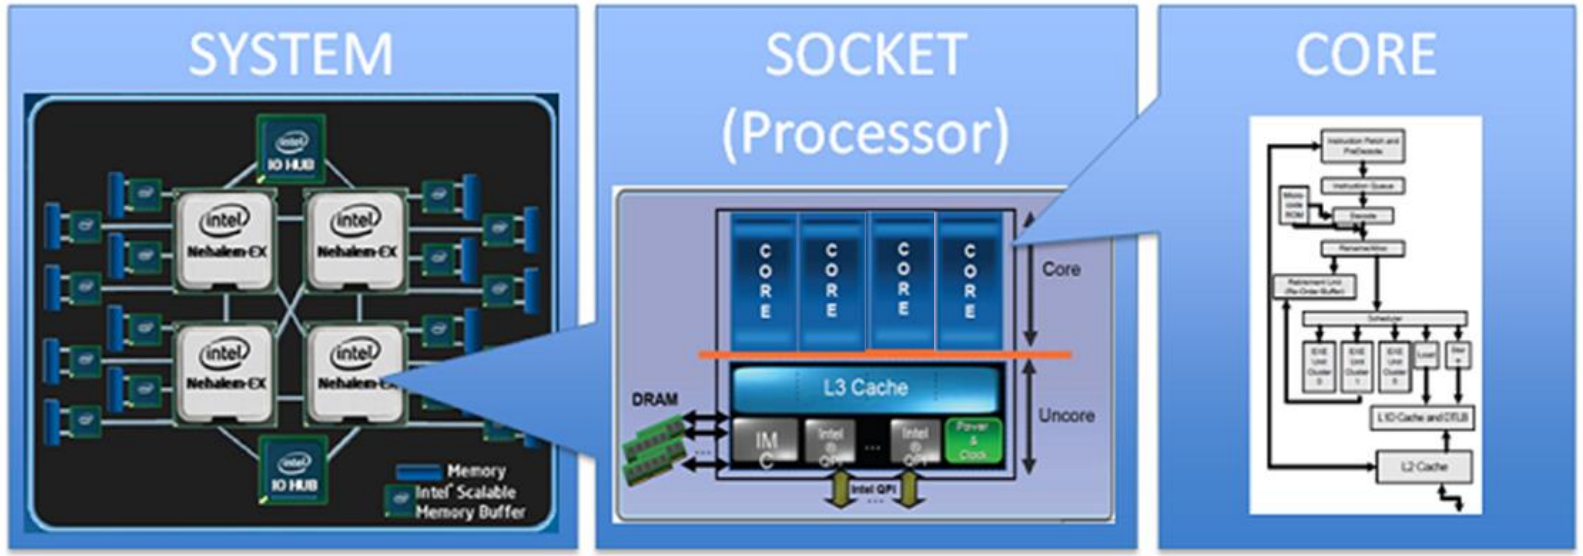
1) Why HPC?

- **How many cores does this computer have?**



1) Why HPC?

- **How many cores does this computer have?**



4 cores * 4 processors = 16 total cores

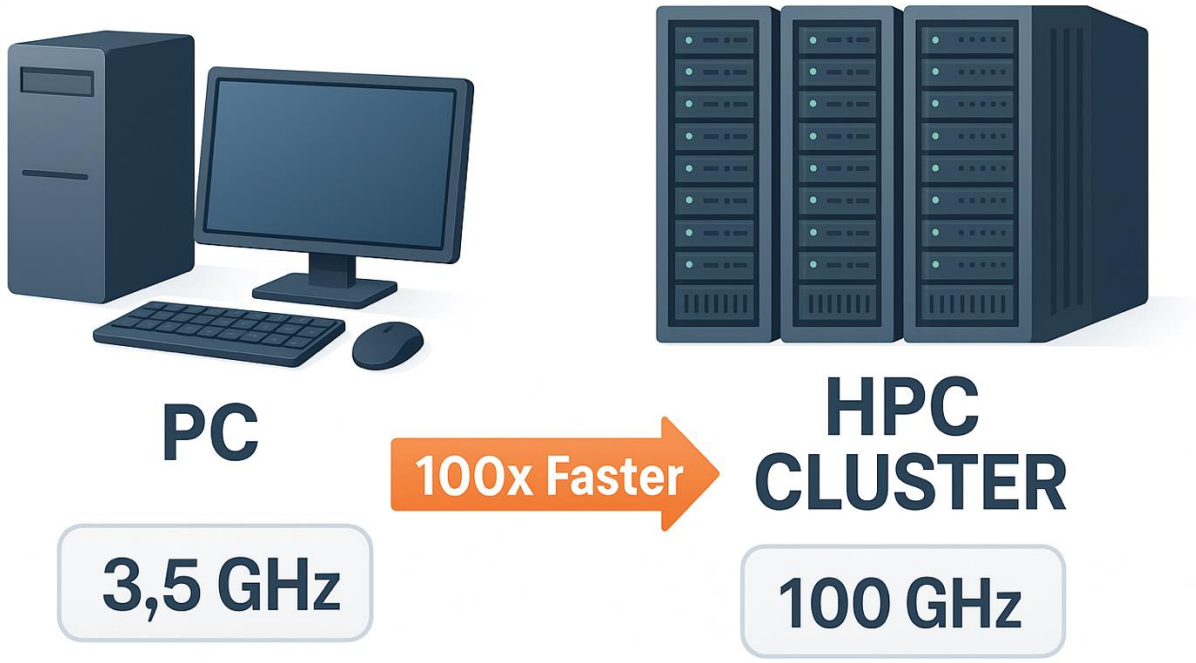
Outline

- **HPC User Environment 1**

1. Intro to HPC
    1) Why HPC?
    2) What is HPC?
    3) Our HPC
2. Getting started
    1) Accounts
    2) Allocation
3. Into the cluster
    1) Getting connected
    2) File system
4. Software environment
    1) Preinstalled (modules)
    2) User installation

2) What is HPC?

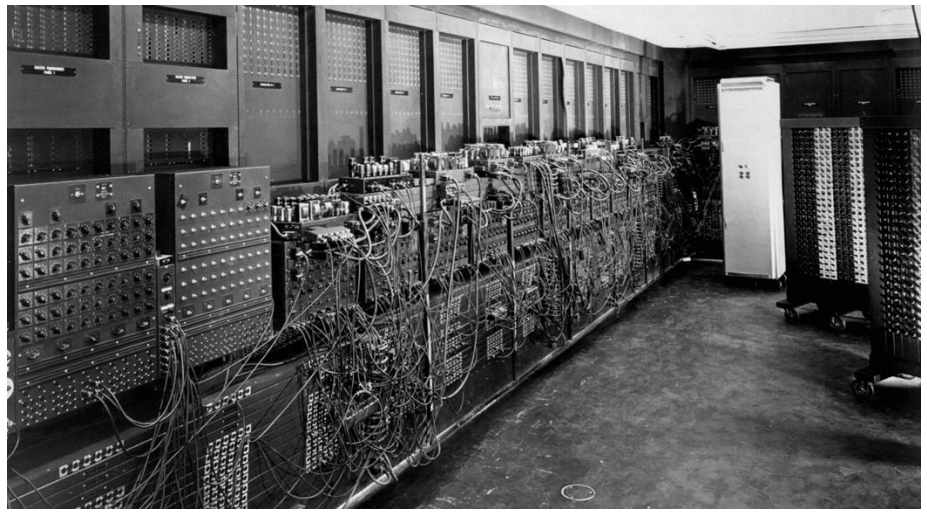
- **High Performance Computing (HPC)**:
  The ability to process data and perform complex calculations at high speeds using cutting-edge modern technology.
- **Supercomputer**:
  The class of machines that ranks among the fastest in the world.
  - Rule of thumb: at least 100 times as powerful as a single PC.



How do we evaluate the performance of supercomputer?

2) What is HPC?

- **Performance is measured in Floating Point Operations Per Second (FLOPS)**



ENIAC FLOPS: 500

$$FLOPS = cores \times clock \times \frac{FLOPs}{cycle}$$

18 cores × 4.4 GHz × 16 FLOPs/cycle

1267 GHz

1.27 TFLOPS

Computer performance

Name	FLOPS
yottaFLOPS	10^{24}
zettaFLOPS	10^{21}
exaFLOPS	10^{18}
petaFLOPS	10^{15}
teraFLOPS	10^{12}
gigaFLOPS	10^{9}
megaFLOPS	10^{6}
kiloFLOPS	10^{3}

"*The first teraflop desktop PC:* Intel i97980XE (Sep 2017)"

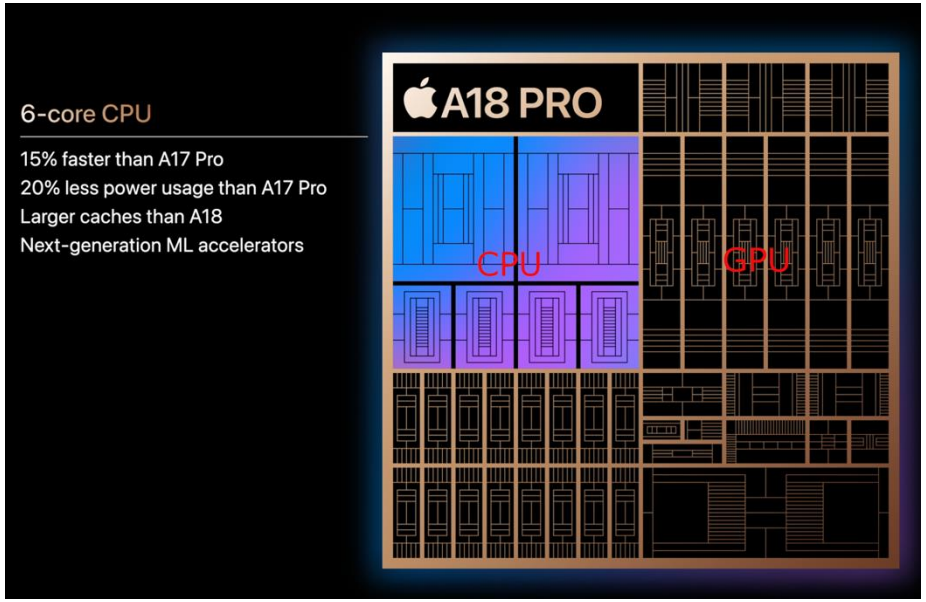
CPU clock rate: 4.4 GHz
CORE: 18 cores
FLOPs per cycle: 16

https://en.wikichip.org/wiki/flops

2) What is HPC?

- **Your smartphone vs. supercomputer 24 and 30 years ago**
  - **Apple A18 Pro** (Hexa-core, 4.04 GHz): **~2.6 TFLOPS (FP32)**
    (can perform 2.6 trillion 32-bit math operations per second)
  - #1 ASCI WHITE, SP POWER3 375 MHZ: **7.3 (12.3) TFLOPS**
    Total Cores: **8,192**, OS: **AIX**; Vendor: **IBM (2000)**
  - #1 **Fujitsu** 105MHz: **0.2 (0.4) TFLOPS**
    Total Cores: **140**, OS: **UXP/V**; Vendor: **Fujitsu (1994)**

iPhone 16 Pro (2024)



CPU clock rate: 4.04 GHz
CORE: ARMv9.2, 6 cores
Transistors: 18 billion
Technology: 3 nm
OS system: iOS 18.5

[1] iPhone 16 — September 24, https://en.wikipedia.org/wiki/IPhone_16_Pro

i. University level: LSU HPC

SuperMIC	
Hostname	smic.hpc.lsu.edu
Peak Performance/TFlops	1000
Compute nodes	360
Processor/node	2 10-core
Processor Speed	2.8 GHz
Processor Type	Intel Xeon 64bit
Nodes with Accelerators	360
Accelerator Type	Xeon Phi 7120P
OS	RHEL v8
Vendor	
Memory per node	64 GB
Detailed Cluster Description	
User Guide	
Available Software	

Deep Bayou	
Hostname	db1.lsu.edu
Peak Performance/TFlops	257
Compute nodes	13
Processor/node	2 24-core
Processor Speed	2.4 - 3.0 GHz
Processor Type	Intel Cascade Lake Xeon 64bit
Nodes with Accelerators	13
Accelerator Type	2 x NVIDIA Volta V100S
OS	RHEL v8
Vendor	Dell
Memory per node	192 GB
Detailed Cluster Description	
User Guide	
Available Software	

SuperMike III	
Hostname	mike.hpc.lsu.edu
Peak Performance/TFlops	1,285
Compute nodes	183
Processor/node	2 32-core
Processor Speed	2.6GHz
Processor Type	Intel Xeon Ice Lake
Nodes with Accelerators	8
Accelerator Type	4 NVIDIA A100
OS	RHEL v8
Vendor	Dell
Memory per node	256/2048 GB

Questions?

Outline

- **HPC User Environment 1**

1. Intro to HPC
    1) Why HPC?
    2) What is HPC?
    3) Our HPC
2. Getting started
    1) Accounts
    2) Allocation
3. Intro the cluster
    1) Getting connected
    2) File system
4. Software environment
    1) Preinstalled (modules)
    2) User installation

Two things are needed to run jobs on our clusters

1) Account

2) Allocation

i. Eligibility

Test1

- **I can be granted an LSU HPC or LONI account if:**

a) I am using HPC resource for my research, the account will be sponsored by my advisor (PI)
b) I am attending HPC training sessions, the account will be sponsored by the HPC staff
c) I am taking a class that requires using HPC resource, the account will be sponsored by the course instructor
d) a and b
e) a and c
f) All of the above

i. Eligibility

Test1

❖ **I can be granted an LSU HPC or LONI account if:**

a) I am using HPC resource for my research, the account will be sponsored by my advisor (PI)
b) I am attending HPC training sessions, the account will be sponsored by the HPC staff
c) I am taking a class that requires using HPC resource, the account will be sponsored by the course instructor
d) a and b
e) a and c
f) All of the above

i. Eligibility

Test2

- **Who may be eligible for LSU HPC accounts? (Choose all that apply)**

a) Alice, a professor in Europe, who collaborates with Professor X @ LSU Baton Rouge campus and wishes to run simulations

b) Bob, recently graduated from LSU and moved to New York for a postdoc position, but is still working with his PhD advisor Professor Y @ LSU Baton Rouge campus to finish their unfinished research

c) Charlie, a current undergraduate student @ LSU Baton Rouge campus, who is taking an online Machine Learning course given by Professor Z @ Stanford, and needs practice on a GPU-enabled HPC system

i. Eligibility

Test2

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu/login_request.php	https://allocations.loni.org/login_request.php

[1] http://www.hpc.lsu.edu/links.php

1) Accounts

ii. How to apply

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu/login_request.php	https://allocations.loni.org/login_request.php
Steps	a) Enter your **institutional email** and submit b) Check email and open the link (valid for 24 hrs) c) Fill the form (In **Contact/Collaborator**, enter your **account sponsor**'s full name) and submit d) You **will receive a notification** when your account is activated once we have verified your credentials • Be patient. Do not reset your password if you cannot log in yet.	

[1] http://www.hpc.lsu.edu/links.php

iii. Manage your account

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu	https://allocations.loni.org

[1] http://www.hpc.lsu.edu/links.php

iii. Manage your account

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu	https://allocations.loni.org
Things to do	• Change personal information, password, … • Change **default shell** (bash / tcsh / ksh / csh / sh) • Request / manage / check allocation • Request / manage / check storage • …	

[1] http://www.hpc.lsu.edu/links.php

iv. Reset password

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu/user_reset.php	https://allocations.loni.org/user_reset.php

[1] http://www.hpc.lsu.edu/links.php

iv. Reset password

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu/user_reset.php	https://allocations.loni.org/user_reset.php
Steps	a) Enter your registered email and submit b) Check email and open the link (valid for 24 hrs) c) Enter your new password and submit d) You will receive a confirmation email once your new password is approved by our staff ** IMPORTANT ** • Your new password is NOT available right away (wait until you receive confirmation of approval) • Do NOT submit multiple times	

[1] http://www.hpc.lsu.edu/links.php

iv. Reset password

Case study

- **User:**
  "I have been trying to access my accounts on QB3 via an SSH client, but the connection won't go through. I reset my passwords this weekend and the terminals keep giving me a 'Password Authentication Failed' error message….."

- **User Services:**
  "When you send a password reset request, it has to be manually processed for security reason before your new password becomes available."

iv. Reset password

Password security

- Passwords should be changed as soon as your account is activated for added security.
- Password must be at least 12 and at most 32 characters long, must contain 3 of the 4 classes of characters
  - Lowercase letters
  - Uppercase letters
  - Digits
  - Special characters (punctuation, spaces, etc.)
- Do not use a word or phrase from a dictionary
- Do not use a word that can be obviously tied to the user (*e.g.*, your name, user name, *etc.*)
- **Do NOT share your password to others, including your advisor!!!!!**

Outline

- **HPC User Environment 1**

1. Intro to HPC
    1) Why HPC?
    2) What is HPC?
    3) Our HPC
2. Getting started
    1) Accounts
    2) Allocation
3. Intro the cluster
    1) Getting connected
    2) File system
4. Software environment
    1) Preinstalled (modules)
    2) User installation

2) Allocation

2) Allocation

i. What is allocation?

- A deposit of **service units** (**SU**) that users will be charged from to run jobs on our cluster
  - 1 SU = 1 core-hour
  - Example:
    - My allocation: 50,000 SU
    - Running a job: 24 core * 10 hours = 240 SU
    - Balance: 49,760 SU
  - Cannot run jobs after exhausted
- All LSU HPC & LONI clusters requires allocation to run jobs
- **Free** to users
- But not worthless! (**1 SU ≈ $0.1**)

2) Allocation

ii. Eligibility

You are a …	To get allocation …

2) Allocation

ii. Eligibility

You are a …	To get allocation …
Account sponsor / PI*	Submit a request

* Full-time faculty & certain research staff @ LSU / LONI subscribers

ii. Eligibility

You are a …	To get allocation …
Account sponsor / PI*	Submit a request
Non-account sponsor / non-PI	Join your sponsor's allocation

* Full-time faculty & certain research staff @ LSU / LONI subscribers

2) Allocation

iii. Request an allocation (if you are an account sponsor / PI)

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu/allocations.php	https://allocations.loni.org/allocations.php

[1] http://www.hpc.lsu.edu/links.php

iii. Request an allocation (if you are an account sponsor / PI)

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu/allocations.php	https://allocations.loni.org/allocations.php
Steps	a) Log in using your account b) Click on "New Allocation for [Cluster Name]" • SuperMIC & SuperMike III share allocations • QB3 and QB4 share allocations • Deep Bayou has separated allocation c) Fill the form and submit d) Your request will be reviewed, and you will be notified if your allocation is approved	

[1] http://www.hpc.lsu.edu/links.php

iii. Request an allocation (if you are an account sponsor / PI)

Allocation types

Type	Size [SU]	Can be requested…	Decisions made on…	Activated on…	Limited to…

2) Allocation

iv. Join an allocation (if you are not an account sponsor / PI)

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu/allocations.php	https://allocations.loni.org/allocations.php

2) Allocation

iv. Join an allocation (if you are not an account sponsor / PI)

	LSU HPC	LONI
Portal	https://accounts.hpc.lsu.edu/allocations.php	https://allocations.loni.org/allocations.php
Steps	**[Method 1: Join by request]** a) Log in using your account b) Click on “Join allocation” c) Search for your account sponsor / PI, and click "Join Projects" d) Find the desired allocation you wish to join, click “Join” e) Your account sponsor / PI will receive an email notification and approve your request **[Method 2: Ask your PI to add you]** a) Ask your PI to log in using his/her account b) Click on “Manage memberships” c) Find the desired allocation, click “Edit -> Add a User” d) Search for your account, click “Add to [Allocation name]”	

*** HPC staff CANNOT add you to allocations! Must be approved by your PI!**

iv. Join an allocation (if you are not an account sponsor / PI)

Case study

- **User:**
  "Hi, my PI recently applied for an allocation on SuperMIC and was approved (see forwarded email below). However, I do not see that this allocation is available for my use in https://accounts.hpc.lsu.edu/balances.php . When will I be able to access the allocation?"

- **User Services:**
  "You should either request to join your PI's allocation through the user portal, or ask your PI to add you to the allocation"

Summary

- **Test**

❖ **What are the TWO things required to run jobs on our clusters?**

a) An active myLSU account

b) An active LSU HPC / LONI account

c) An active LSU HPC / LONI allocation

d) A valid payment method (credit card / bank account / check / cash …) to pay for the services

Summary

- **Test**

❖ **What are the <u>TWO</u> things required to run jobs on our clusters?**

a) An active myLSU account

b) An active LSU HPC / LONI account

c) An active LSU HPC / LONI allocation

d) A valid payment method (credit card / bank account / check / cash …) to pay for the services

Break time!

- Login to one of the user portals (LSU HPC or LONI) with your HPC username and password. Update your email and phone number (for practice).
  - LSU HPC: https://accounts.hpc.lsu.edu
  - LONI: https://allocations.loni.org
- Download MobaXterm (if you are Windows user)
- Review commands in Linux and the vim editor

Break time!

Cheat sheet of Commands in Linux	
history	Command history
mkdir	Make a folder
ls	List a folder -a List all files including hidden -l Shows files with a long listing format
cd	Change directory
pwd	Show current directory
cp	Copy
rm	Remove files (CAREFUL!)
Up arrow (↑)	Move back in history
Tab	Fill in unique file name
Tab Tab	Press tab twice, show all available file names

Break time!

Cheat sheet of vim editor

- vi (name of file)
- Commands in VI
  - i enter insert mode (-- INSERT -- shows in the bottom left corner)
  - esc exits insert mode, back to the command mode
    - dd -> deletes line
    - u -> Undo
    - Shift Z shift Z or :wq -> saves and exits VI
    - :q! -> exit without saving
    - : (some number) -> moves through file to row #
    - /(indicator) -> search
      - Use N to find Next
    - [(page up)] (page down)
- NO CAPS (for example :q! is not :Q!)

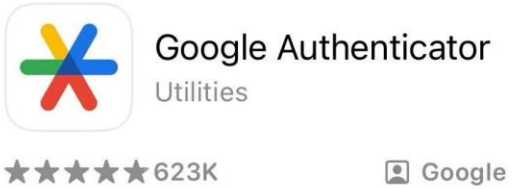
Windows	**MobaXterm**	**Enabled by default** (can be disabled in "Advanced SSH Settings")
	Putty	a) Install X server (*e.g.* Xming) b) Connection → SSH → X11 → Enable X11 forwarding

ii. Logging in

Useful commands	
who	Check who is on the node
balance / showquota	Check allocation balance
history	Command history
mkdir	Make a folder
ls	List a folder -a List all files including hidden -l Shows files with a long listing format
cd	Change directory
pwd	Show current directory
cp	Copy
rm	Remove files (CAREFUL!)
Up arrow (↑)	Move back in history
Tab	Fill in unique file name
Tab Tab	Press tab twice, show all available file names

Multi-factor authentication

1. Install an authenticator on your smartphone



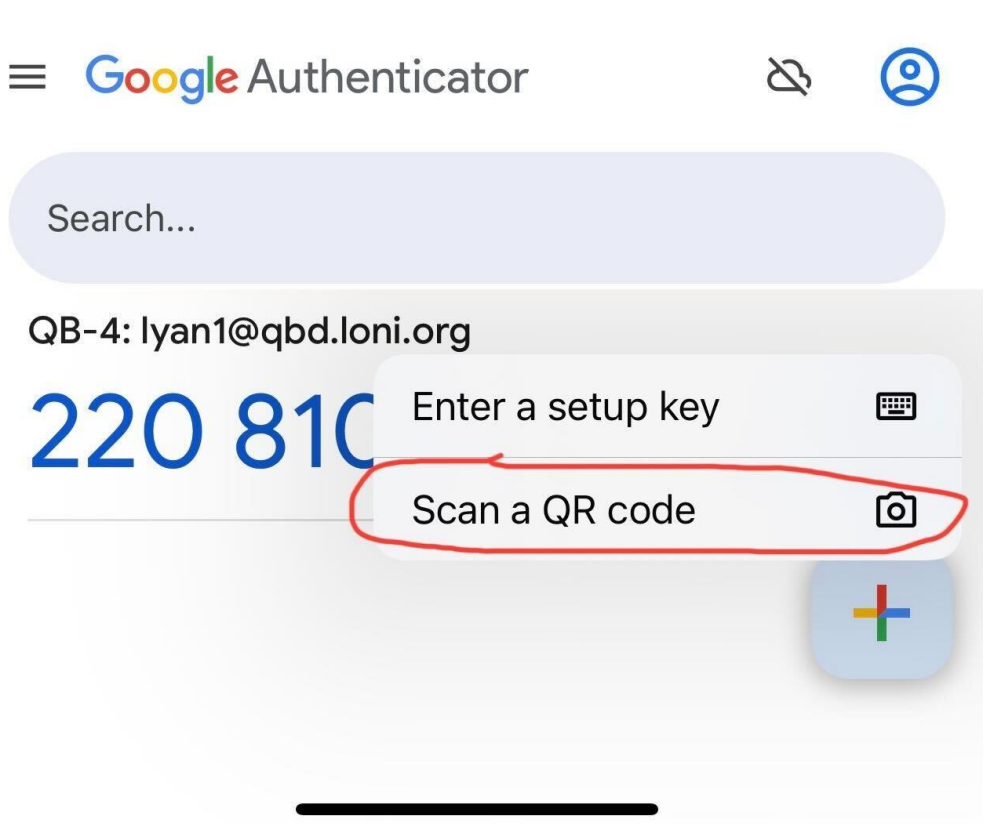
We recommend Google Authenticator, but any Time-based One-Time Password (TOTP) authenticator (e.g. Microsoft Authenticator, Authy etc.) would do. You can search for these authenticators in the app store for any apps on your phone.

2. Log in to the cluster using your credentials: ssh –X username@qbd.loni.org

You will see a QR code along with some text and a prompt for the one-time token:

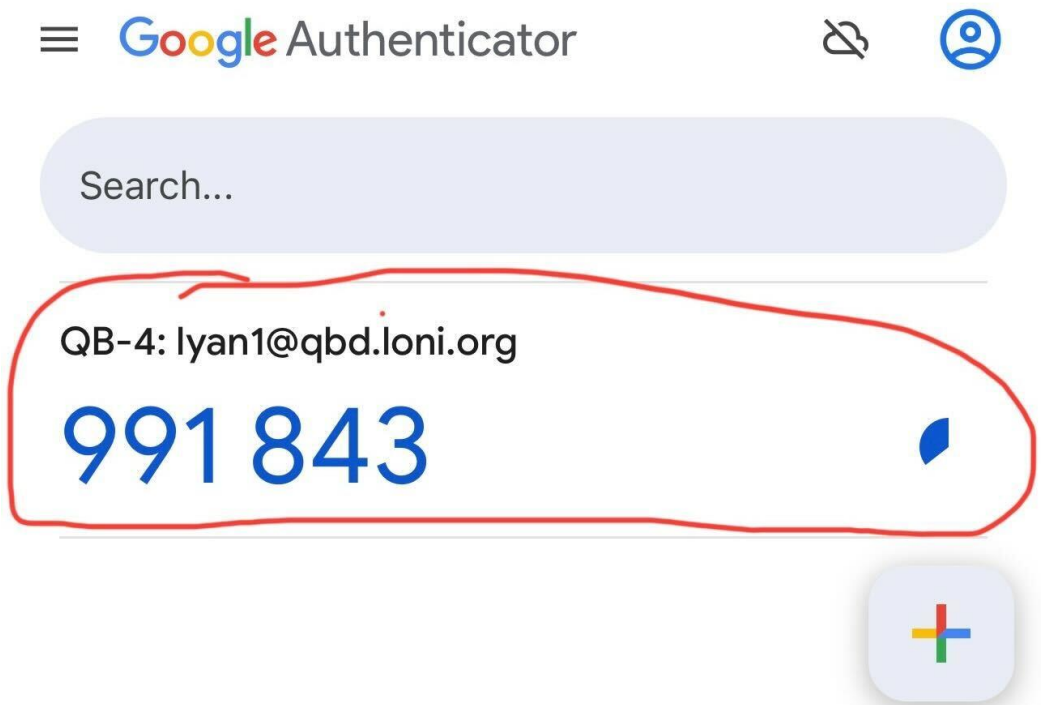
Multi-factor authentication

3. Open (one time) the authentication app on your phone and scan the QR code.



Multi-factor authentication

4. Type the 6-digit one-time token at the prompt and press enter.



Note: the token will expire in 30 seconds after being generated. If it expires, simply use the new token.

Multi-factor authentication

5. Log out and log back in with your ssh client. You should see the token prompt after entering your password.

6. Enter the token in your authenticator at the prompt as you did in Step 4.

- If you log in successfully, no token will be required again for the next 12 hours if you log in from the same IP addresss. You do need to type your password everytime.
- In the future, you only need to repeat **Step 5** and **6** to log in.

If you do not have a smartphone or the authenticators do not work on your phone, you can also choose to use desktop applications. KeepPassXC is an excellent choice, which also provides a browser extension and can be used as a password manager. If you need help setting it up, please contact us at sys-help@loni.org.

/work/[username]	√	High	60 days of inactivity	Unlimited	Job input/output
/project/[Pi's username]	√	Medium / High	1 year (renewable)	As PI requested (N x 100GB)	Specific project / group sharing. **NOT for archive!**
/var/scratch	×	High	End of job	Subject to node specs	(Most users do not need it. Only rare cases)

- **Tips**
  - **Neither /work nor /project** is for long-term storage
  - /work directory will be created **1 hour** after the first cluster login
  - /project directory: **Only PI w/ active allocations** can apply! (See appendix or contact us)
  - **Never** write output to your home directory!
  - Check current disk quota and usage: **balance / showquota**

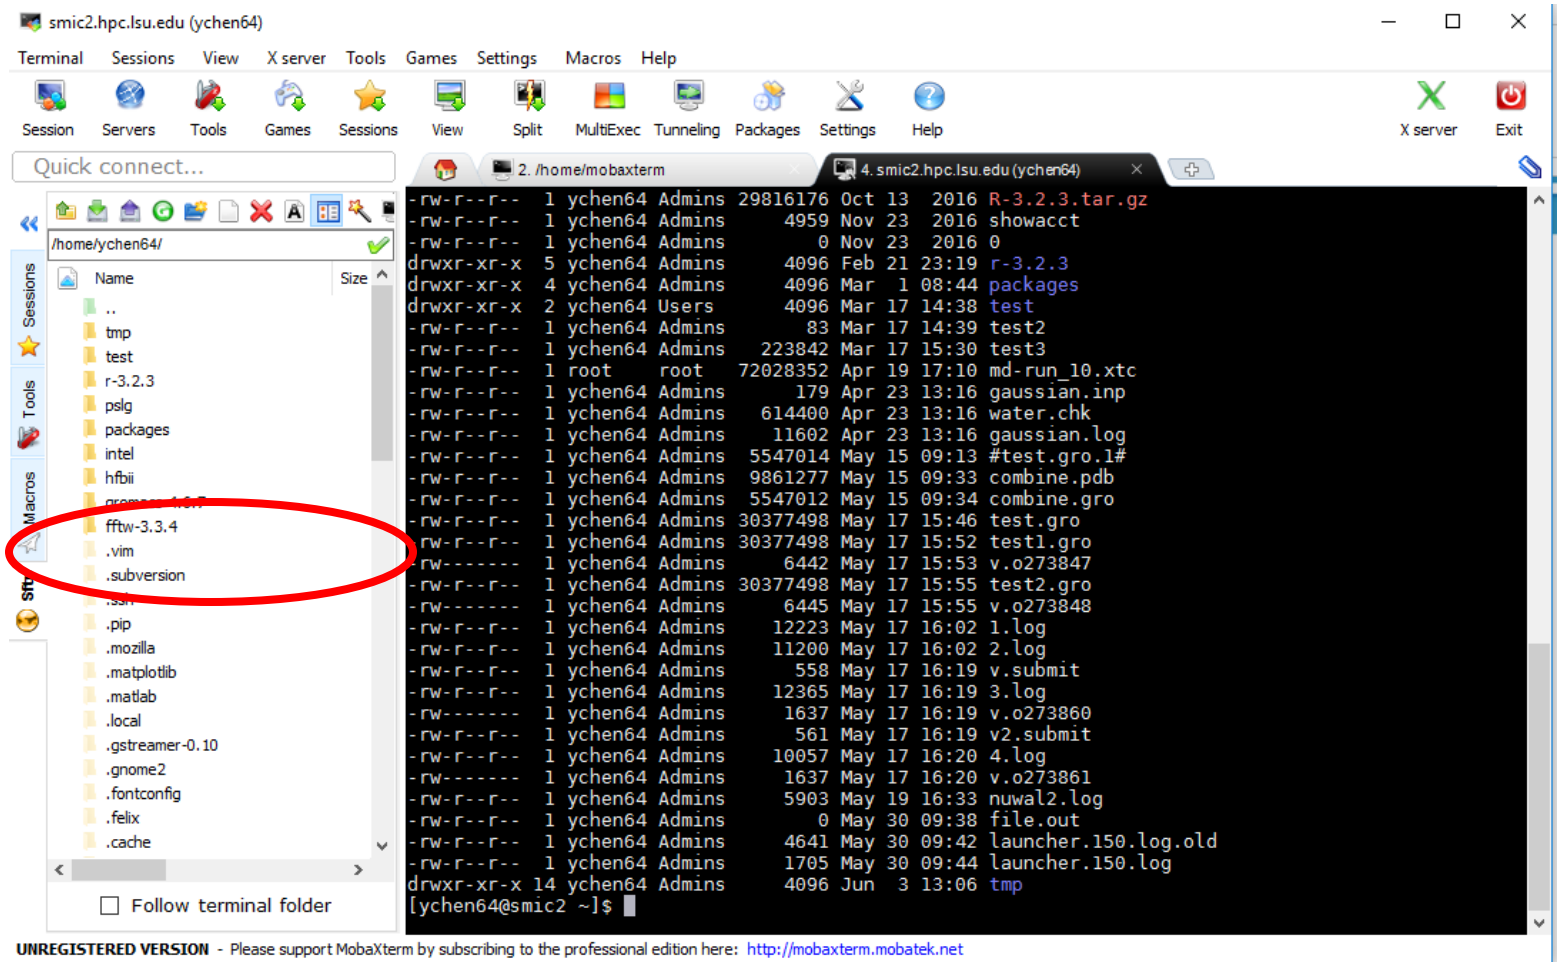
2) File system

- **File transfer**

Commands	
scp / rsync	From/to a Unix/Linux/Mac machine (including between the clusters) • Syntax: - `scp <options> <source> <destination>` - `rsync <options> <source> <destination>`
wget	From a download link on a website (usually opened with a web browser) • Syntax: - `wget <link>`

2) File system

- **File transfer**



Outline

- **HPC User Environment 1**

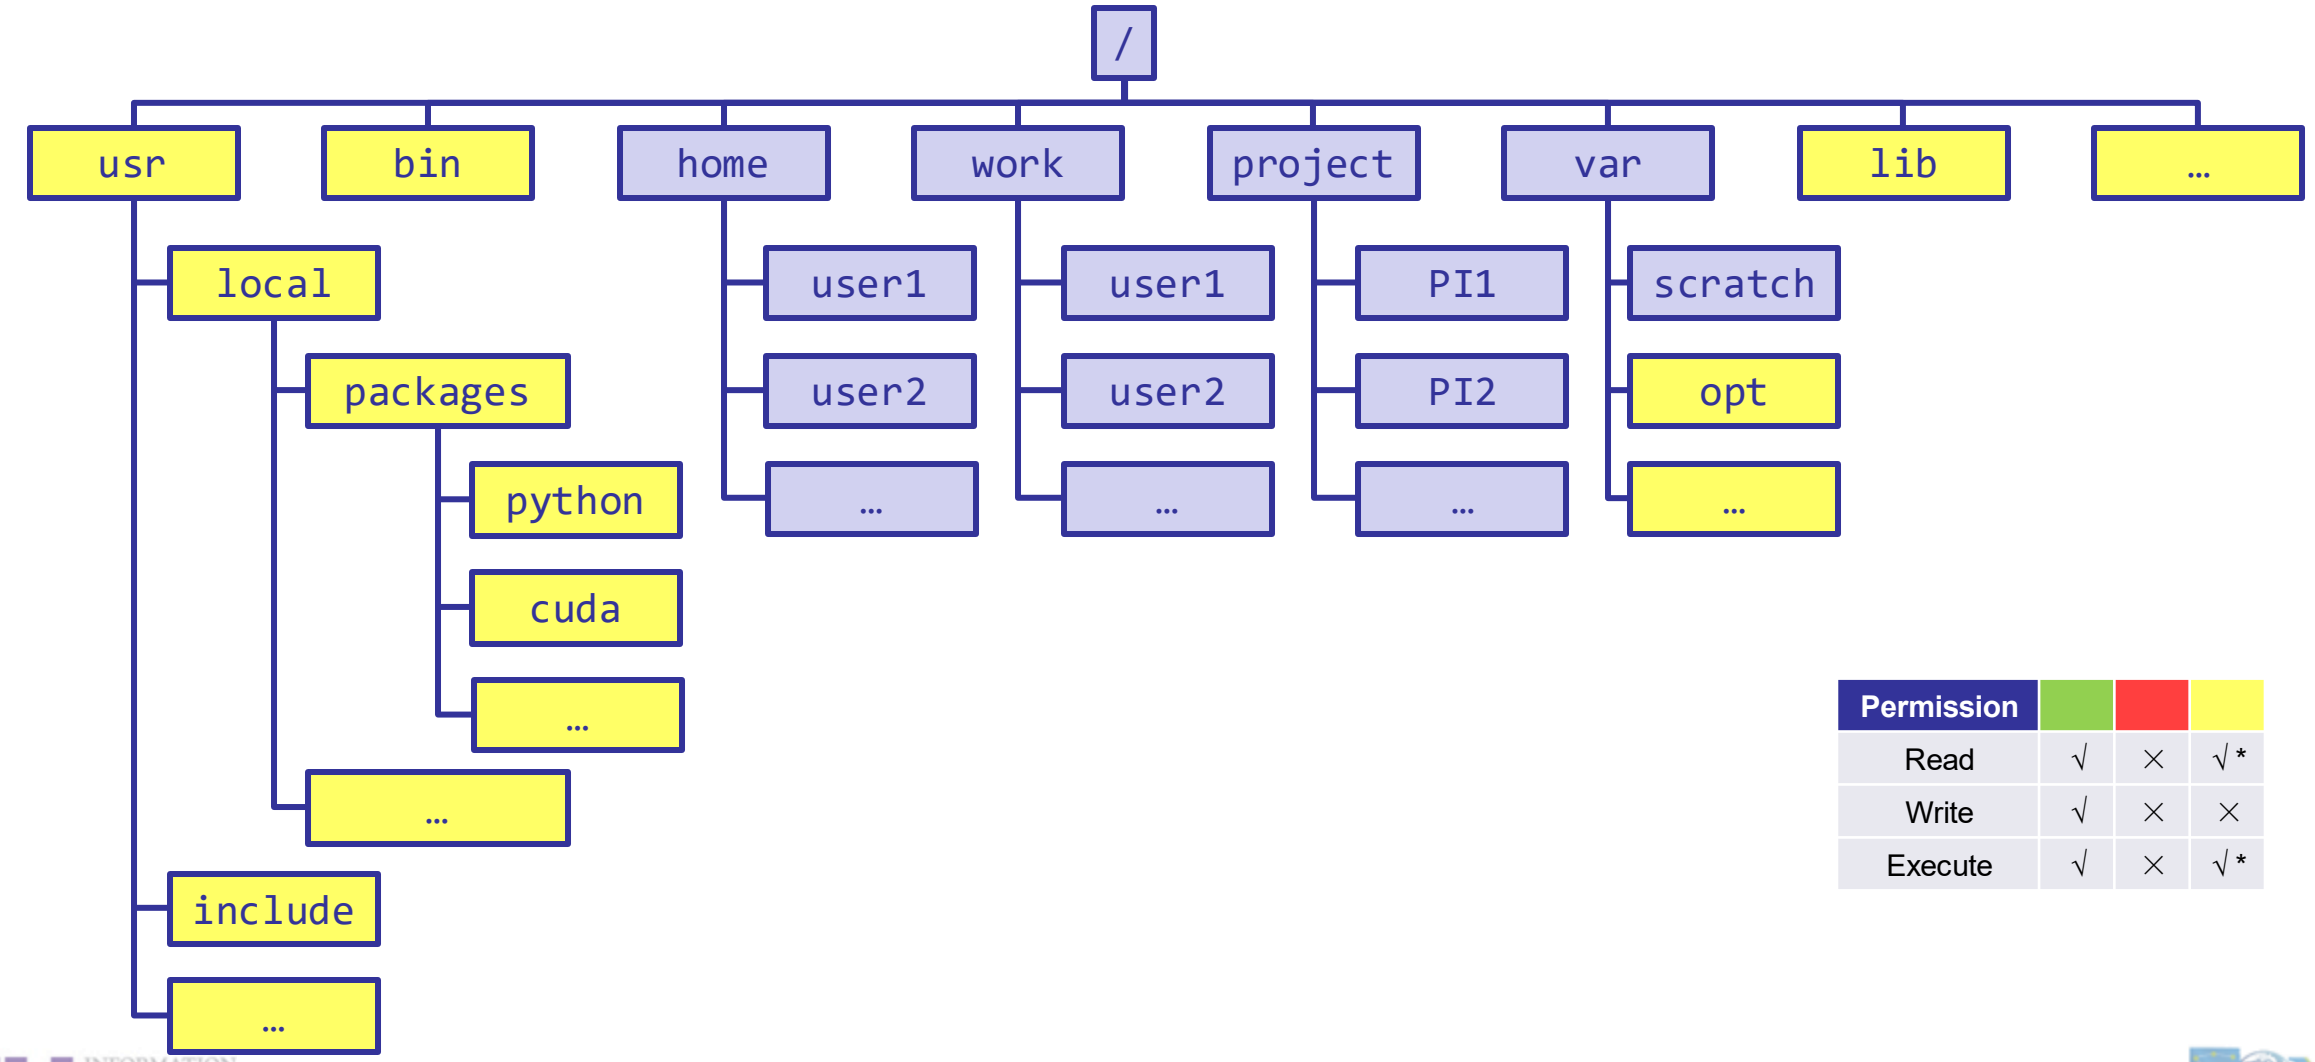
1. Intro to HPC
    1) Why HPC?
    2) What is HPC?
    3) Our HPC
2. Getting started
    1) Accounts
    2) Allocation
3. Into the cluster
    1) Getting connected
    2) File system
4. Software environment
    1) Preinstalled (modules)
    2) User installation

Outline

- **HPC User Environment 1**

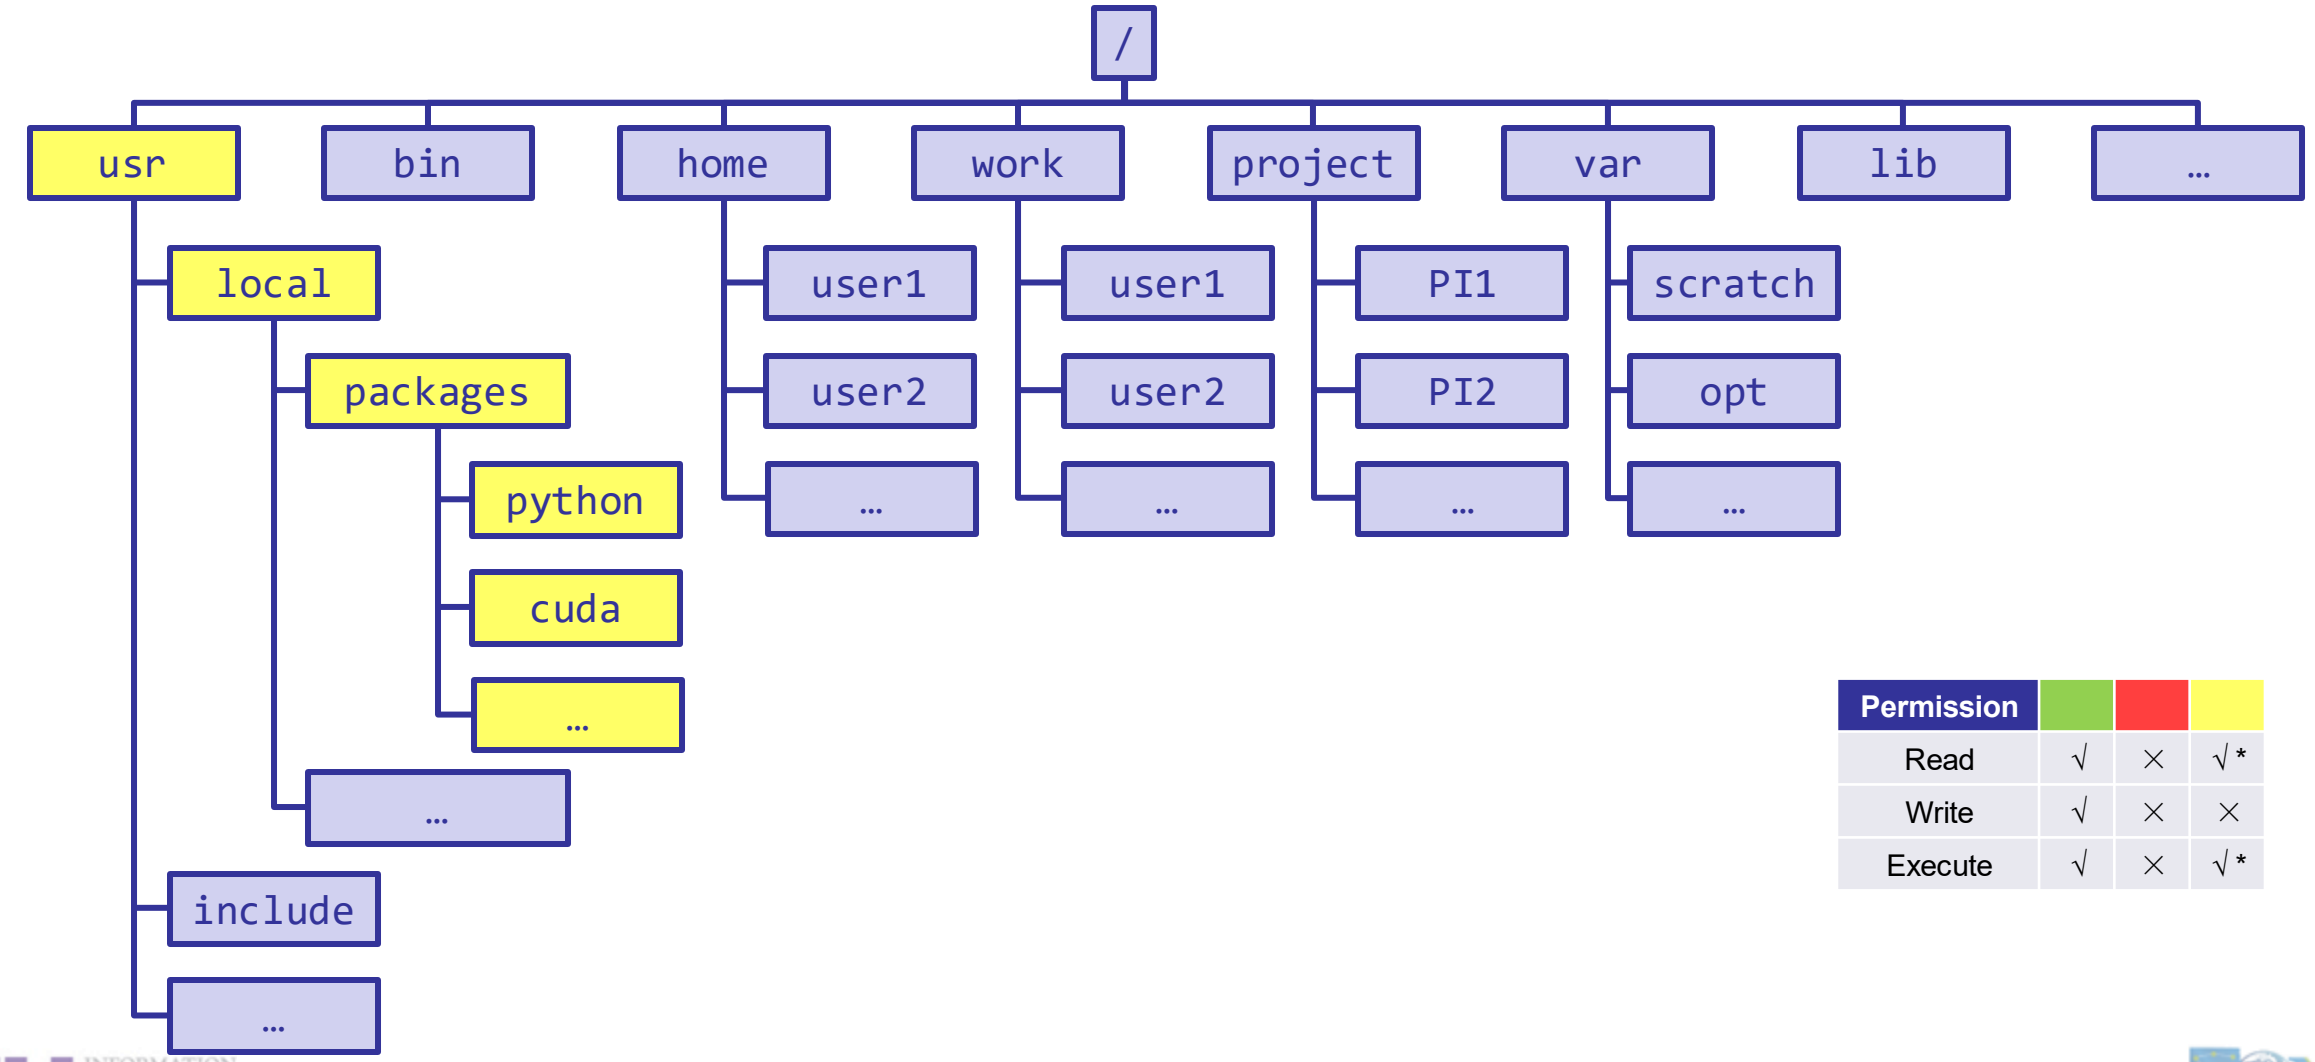
1. Intro to HPC
    1) Why HPC?
    2) What is HPC?
    3) Our HPC
2. Getting started
    1) Accounts
    2) Allocation
3. Into the cluster
    1) Getting connected
    2) File system
4. Software environment
    1) Preinstalled (modules)
    2) User installation

1) Preinstalled (modules)



Permission			
Read	√	×	√*
Write	√	×	×
Execute	√	×	√*

1) Preinstalled (modules)



Permission			
Read	√	×	√*
Write	√	×	×
Execute	√	×	√*

1) Preinstalled (modules)

- **Modules**
  - Software that can be loaded / unloaded on demand.
  - List of modules preinstalled system-wide: https://www.hpc.lsu.edu/docs/guides/index.php

Category	Modules
Mathematical & utility	FFTW, HDF5, NetCDF, PETSc …
Applications	Amber, CPMD, NWChem, NAMD, Gromacs, R, LAMMPS ...
Visualization	VisIt, VMD, GaussView …
Programming Tools	Totalview, DDT, TAU …

1) Preinstalled (modules)

- **Modules**

Useful commands	
module available (module av)	List available modules on the cluster
module list (module li)	List currently loaded modules
module load [module name]	Load module(s)
module unload [module name]	Unload module(s)
module swap [module 1] [module 2]	Unload a Module 1 and load Module 2
module purge	Unload all modules
module display [module name]	Display module information and all environmental variables changes when loaded

1) Preinstalled (modules)

- **Modules**
  - Auto-load modules: **~/.modules**

Outline

- **HPC User Environment 1**

1. Intro to HPC
    1) Why HPC?
    2) What is HPC?
    3) Our HPC
2. Getting started
    1) Accounts
    2) Allocation
3. Into the cluster
    1) Getting connected
    2) File system
4. Software environment
    1) Preinstalled (modules)
    2) User installation

2) User installation

You can't…	You can…

2) User installation

You can't…	You can…
• yum / apt-get • sudo (!!!) • …	

2) User installation

You can't…	You can…
• yum / apt-get • sudo (!!!) • …	• Build from source • Use virtual environment (*e.g.*, conda) * • Advanced methods (*e.g.*, Singularity) * • Ask HPC staff for help • …

[1] http://www.hpc.lsu.edu/training/archive/tutorials.php

2) User installation

- **Recommended paths:**

  a) /home (for yourself)
  b) /project (for group sharing or large applications)

Summary

- **Two types of software packages:**
  - Preinstalled (modules)
  - User installed

Take home message

- **HPC User Environment 1**

1. Intro to HPC
   1) Why HPC?
   2) What is HPC?
   3) Our HPC → **LSU HPC (SMIC, Deep Bayou, SuperMike III) / LONI (QB3, QB4)**
2. Getting started
   1) Accounts → **Need an account sponsor! Most likely a faculty**
   2) Allocation → **Request a new one or join an existing one**
3. Into the cluster
   1) Getting connected → **Logging in via SSH; Do NOT run jobs on head node**
   2) File system → **Know your /home, /work, /project**
4. Software environment
   1) Preinstalled → **Use modules**
   2) User installation → **No sudo or yum**

Next week

- **HPC User Environment 2**

  1. Queuing system
  2. How to run jobs

Contact us

- **Contact user services**
  - Email Help Ticket: sys-help@loni.org
  - Telephone Help Desk: +1 (225) 578-0900

Appendix 1. Applying for storage allocation (/project)

- **Storage allocation ≠ computing allocation (what we talked about today)**
- **PI can apply for extra disk space on the /project volume for you and his/her entire research group if**
  - your research requires some files to remain on the cluster for a fairly long period of time; **and**
  - their size exceeds the quota of the /home
- **The unit is 100 GB**
- **Storage allocations are good for 1 year, but can be extended based on the merit of the request**
- **Examples of valid requests**
  - I am doing a 12-month data mining project on a large data set
  - The package I am running requires 10 GB of disk space to install
- **Examples of invalid requests**
  - I do not have time to transfer the data from my scratch space to my local storage and I need a temporary staging area

Appendix 2. Create your own module key

- **An example of a simple module file (~/my_module/gitkey):**

```
#%Module
proc ModulesHelp { } {
    puts stderr { my compiled version of git.
    }
}
module-whatis {version control using git}
set GIT_HOME /home/fchen14/packages/git-master/install
prepend-path    PATH            $GIT_HOME/bin
```

- **Add the path to the key to the MODULEPATH environment variable:**

```
$  export MODULEPATH=~/my_module:$MODULEPATH
```

- **Then try to use:**

```
$  module load gitkey
$  which git
$  module unload gitkey
$  which git
```
