

Data Science Student Consultant

Eligibility

Full-time LSU graduate students in good academic standing

Location

Frey Computing Services building

Why work for us

The data science student consultants will have the opportunities to build their project portfolio, learn new technical skills, and develop and practice teaching and consulting skills. We welcome students from all fields of research and diversity of backgrounds.

Job duties

- Support data science research projects by developing codes and applications
- Help researchers by giving advice, teaching best practices, and troubleshooting code
- Teach workshops in programming for data sciences

Skills required

- Strong programming skills in Python
- Familiarity with at least one of the following programming languages or programs (in addition to Python): R, Stata, MATLAB, Java, Javascript, bash, or other languages.
- Comfortable researching solutions to technical problems and explaining technical concepts to people with a wide range of abilities.
- Organized, self-motivated, with strong initiative and commitment to excellence

Additional requirements

- Department and advisor approval is required
- Must be enrolled in a graduate program with a minimum of 9 semester hours.

Stipend

\$14,400 for 12 months
